

Subject card

Subject name and code	PRACTICE, PG_00049392						
Field of study	Green Technologies						
Date of commencement of studies	October 2020	Academic year of realisation of subject			2022/2023		
Education level	first-cycle studies	Subject group			Optional subject group		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	3	Language of instruction			Polish		
Semester of study	6	ECTS credits			6.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of Chemistry and Technology of Functional Materials -> Faculty of Chemistry						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Radosław Pomećko				
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	0.0	0.0	0.0	0
E-learning hours included: 0.0							
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	0		5.0		155.0	160
Subject objectives	The student knows the chemical basics of technological process taking place in the production plant. The student gets acquainted to work in teams, and in environment of the production plant.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K6_K03] turns the attention to the prestige associated with the profession and professional solidarity properly understood, shows respect for others and concern for their welfare	The student knows the role and importance of engineer profession.			[SK4] Assessment of communication skills, including language correctness		
	[K6_K01] understands the need for learning throughout life, can inspire and organize the learning process of others. Is aware of his/her own limitations and knows when to ask the experts, can properly identify priorities for implementation, critically evaluate his knowledge	The student has the knowledge and abilities to solve given technological problems.			[SK2] Assessment of progress of work		
	[K6_K06] has awareness of the importance of non-technical aspects and effects of engineering activities, including its impact on the environment and the associated responsibility for decisions.	The student is aware of influence of technological activity on natural environment. The student is able to identify the threats, and propose the methods to solve them.			[SK5] Assessment of ability to solve problems that arise in practice [SK2] Assessment of progress of work		
Subject contents	The main task of practice is to evaluate and improve the technological skills and abilities of the student, which were acquired during the studies. The practice gives the chance to apply those skills in the technological processes in environment of the production plant.						
Prerequisites and co-requisites	The student has appropriate knowledge of chemistry and chemical technology.						
Assessment methods and criteria	Subject passing criteria	Passing threshold			Percentage of the final grade		
		60.0%			40.0%		
		100.0%			10.0%		
		100.0%			50.0%		

Recommended reading	Basic literature	The rules of students practice of Faculty of Chemistry, Gdansk University of Technology, (https://chem.pg.edu.pl/studenci/praktyki-i-staze).
		BHP guidance, technological statements and other materials given by the host institution.
	Supplementary literature	Not indicated.
	eResources addresses	Adresy na platformie eNauczanie:
Example issues/ example questions/ tasks being completed		
Work placement	Not applicable
