GDAŃSK UNIVERSITY OF TECHNOLOGY

Subject card

Subject name and code	, PG_00052088		
Field of study	Nanotechnology		
Date of commencement of studies	October 2020	Academic year of realisation of subject	2022/2023
Education level	first-cycle studies	Subject group	Optional subject group Subject group related to scientific research in the field of study
Mode of study	Full-time studies	Mode of delivery	at the university
Year of study	3	Language of instruction	Polish
Semester of study	6	ECTS credits	4.0
Learning profile	general academic profile	Assessment form	assessment
Conducting unit	Instytut Nanotechnologii i Inżynierii Materiałowej -> Faculty of Applied Physics and Mathematics		
Name and surname of lecturer (lecturers)	Subject supervisor	dr hab. inż. Agnieszka Witkowska	
	Teachers	dr inż. Magdalena Jażdżewska dr hab. inż. Agnieszka Witkowska dr inż. Marek Augustyniak dr inż. Marta Prześniak-Welenc	

Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	0.0	45.0	0.0	45
	E-learning hours included: 0.0						

Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM
	Number of study hours	45	5.0	50.0	100

Subject objectives	The aim of the course is: 1. preparing students to complete an engineering diploma project, including: engineering and non-engineering aspects, proper and critical selection of source materials, literature review, planning and implementing the experimental or numerical-simulation part of an engineering project; 2. presenting students the diploma examination procedure and preparing them for an oral presentation of the results of the diploma project.

Learning outcomes

Course outcome	Subject outcome	Method of verification
K6_K05	The student has the ability to prepare and orally present the results of their work and participate in discussions, in Polish, on the issues analyzed in the discussed diploma projects. He is able to constructively evaluate his own results and the results of others.	[SK4] Assessment of communication skills, including language correctness
K6_U07	After analyzing a simple research/ technical problem (including the engineering project selected for implementation), the student is able to perform a preliminary economic analysis of planned experiments and activities aimed at solving the problem.	[SU3] Assessment of ability to use knowledge gained from the subject
K6_U11	The student has the ability to prepare the proper structure of a scientific work and write its introductory part, and is able to prepare a professional presentation template for an oral presentation (in Polish), presenting issues from the diploma project.	[SU1] Assessment of task fulfilment [SU4] Assessment of ability to use methods and tools
K6_U04	After getting acquainted with the research problem, the student has the ability to plan an experiment and select the appropriate experimental tools, analyse research results and conduct a critical discussion.	[SU2] Assessment of ability to analyse information

Subject contents

Part 1.
Writing a diploma thesis - introduction;
Effective and critical search of internet resources;
Literature databases: tools for searching databases and creating a reference list;
Literature review related to diploma thesis.

Part 2.
Skills of conducting white intelligence;
Meetings with graduates;
Trip(s) to places where internships were held and/or to places potentially attractive from the point of view of professional career;
Professional mentoring, CV preparation.

Part 3.
Diploma procedure;
Diploma presentation: elements of the presentation, the way of presenting the content and scientific results;
Preparation of a presentation template;
Oral presentation training: presentation and discussion of the preliminary results of the diploma project.

Prerequisites and co-requisites

Assessment methods and criteria

Subject passing criteria	Passing threshold	Percentage of the final grade
Part 1. Preparation of the bibliography for the diploma thesis; Part 2. Completion of two mini-tasks; Part 3. Seminar preparation and presentation	50.0%	100.0%

Recommended reading
