

Subject card

Subject name and code	Programming Communication Micromodules, PG_00048106						
Field of study	Electronics and Telecommunications						
Date of commencement of studies	October 2020	Academic year of realisation of subject			2023/2024		
Education level	first-cycle studies	Subject group			Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	4	Language of instruction			Polish		
Semester of study	7	ECTS credits			2.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of Microwave and Antenna Engineering -> Faculty of Electronics, Telecommunications and Informatics						
Name and surname of lecturer (lecturers)	Subject supervisor	dr hab. inż. Łukasz Kulas					
	Teachers	dr hab. inż. Łukasz Kulas					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	15.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study		SUM
	Number of study hours	30	2.0		18.0		50
Subject objectives	The aim of the subject is introduction to wireless embedded devices programming, getting familiar with the rules of embedded devices programming and basics of wireless embedded devices programming techniques.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K6_W34] Knows the characteristics of telecommunications channels, methods of securing information, modulation systems, methods of access to the channel.	Getting knowledge about basic elements with respect to IC programming for wireless communication.			[SW1] Assessment of factual knowledge		
	[K6_U03] can design, according to required specifications, and make a simple device, facility, system or carry out a process, specific to the field of study, using suitable methods, techniques, tools and materials, following engineering standards and norms, applying technologies specific to the field of study and experience gained in the professional engineering environment	Ability to develop programs for simple wireless embedded system. Ability to present realized programming tasks with respect to IC programming for wireless communication.			[SU1] Assessment of task fulfilment		

Subject contents	<p>Lecture</p> <ul style="list-style-type: none"> • Introduction to wireless embedded devices programming • Rules of embedded devices programming • Basics of wireless embedded devices programming • Exceptions and memory management in wireless embedded devices context • Coding standards for the development of embedded devices • Introduction to embedded devices programming using API • Embedded devices programming using API - basic operations • Embedded devices programming using API - operations on peripherals • Memory operations during the process of code development for embedded devices • Advanced bit operations • Introduction to embedded devices programming without API • Embedded devices programming without API <p>Laboratory</p> <ul style="list-style-type: none"> • Introduction to embedded devices programming using API • Embedded devices communication • Development of wireless mesh network for embedded devices • Embedded devices programming using API - operations on peripherals • Development of embedded systems 											
Prerequisites and co-requisites	Basic knowledge of C/C++ programming. Student should have knowledge of the course Wireless Devices Design, particularly in the field of ZigBee technology.											
Assessment methods and criteria	<table border="1" data-bbox="448 857 1487 965"> <thead> <tr> <th data-bbox="448 857 794 898">Subject passing criteria</th> <th data-bbox="794 857 1141 898">Passing threshold</th> <th data-bbox="1141 857 1487 898">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="448 898 794 929">Final test</td> <td data-bbox="794 898 1141 929">50.0%</td> <td data-bbox="1141 898 1487 929">50.0%</td> </tr> <tr> <td data-bbox="448 929 794 965">Laboratory score</td> <td data-bbox="794 929 1141 965">50.0%</td> <td data-bbox="1141 929 1487 965">50.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	Final test	50.0%	50.0%	Laboratory score	50.0%	50.0%
Subject passing criteria	Passing threshold	Percentage of the final grade										
Final test	50.0%	50.0%										
Laboratory score	50.0%	50.0%
