

## Subject card

Subject name and code	Electronic Musical Instruments, PG_00048141						
Field of study	Electronics and Telecommunications						
Date of commencement of studies	October 2020	Academic year of realisation of subject			2023/2024		
Education level	first-cycle studies	Subject group			Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	4	Language of instruction			Polish		
Semester of study	7	ECTS credits			2.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of Multimedia Systems -> Faculty of Electronics, Telecommunications and Informatics						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. inż. Grzegorz Szwoch				
	Teachers		dr hab. inż. Grzegorz Szwoch				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	15.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		2.0		18.0	50
Subject objectives	This course teaches students about hardware and software electronic musical instruments. Various sound synthesis algorithms, used in commercial instruments, as well as sampling, are presented. Additional, related topics presented during the course are: MIDI standard, computer music tools and sound effects.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[K6_W35] Knows the concepts of the technique of signal transmission, operation of telecommunications networks and multimedia services and the rules for providing them	The student knows how to control electronic musical instruments, both hardware and software ones, with hardware controllers and with the computer software, using MIDI.	[SW1] Assessment of factual knowledge
	[K6_U07] can apply methods of process and function support, specific to the field of study	The student knows how to modify a synthetic sound by choosing the right synthesis algorithm and by tuning its parameters.	[SU4] Assessment of ability to use methods and tools [SU1] Assessment of task fulfilment
	[K6_U03] can design, according to required specifications, and make a simple device, facility, system or carry out a process, specific to the field of study, using suitable methods, techniques, tools and materials, following engineering standards and norms, applying technologies specific to the field of study and experience gained in the professional engineering environment	The student is able to perform a digital sound synthesis process based on the learned synthesis algorithms. The student can build a virtual instrument based on sampling.	[SU4] Assessment of ability to use methods and tools [SU1] Assessment of task fulfilment
	[K6_W03] Knows and understands, to an advanced extent, the construction and operating principles of components and systems related to the field of study, including theories, methods and complex relationships between them and selected specific issues - appropriate for the curriculum	The student knows how the algorithms for sound synthesis and sampling work.	[SW1] Assessment of factual knowledge
[K6_W05] Knows and understands, to an advanced extent, methods of supporting processes and functions, specific to the field of study	The student knows structure and operation of practically used electronic musical instruments.	[SW1] Assessment of factual knowledge	
Subject contents	<ol style="list-style-type: none"> <li>1. History of electronic musical instruments, basic ideas</li> <li>2. Properties of musical signals, analysis and additive synthesis</li> <li>3. Subtractive synthesis - modular analog synthesis</li> <li>4. Hybrid wavetable synthesis, digital signal generators</li> <li>5. Digital synthesis by frequency modulation (FM) and phase distortion (PD)</li> <li>6. Sampling, samples and samplers</li> <li>7. Physical instrument modelling, waveguide synthesis.</li> <li>8. MIDI in electronic musical instruments</li> <li>9. Computer music software</li> <li>10. Sound effects in electronic musical instruments</li> </ol>		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Practical exercise	50.0%	50.0%
	Colloquium (final)	50.0%	50.0%
