

## 表 GDAŃSK UNIVERSITY OF TECHNOLOGY

## Subject card

Subject name and code	Discrete Mathematics, PG_00047823							
Field of study	Informatics							
Date of commencement of studies	October 2020		Academic year of realisation of subject			2021/2022		
Education level	first-cycle studies		Subject group			Obligatory subject group in the field of study		
						Subject group related to scientific research in the field of study		
Mode of study	Part-time studies		Mode of delivery			at the university		
Year of study	2		Language of instruction			Polish		
Semester of study	3		ECTS credits			4.0		
Learning profile	general academic profile		Assessme	nt form	assessment			
Conducting unit	Department of Algorithms and Systems Modelling -> Faculty of Electronics, Telecommunications and Informatics							
Name and surname of lecturer (lecturers)	Subject supervisor		dr Paweł Obszarski					
	Teachers dr Paweł Obszarski							
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project		Seminar	SUM
	Number of study hours	15.0	15.0	0.0	0.0		0.0	30
	E-learning hours included: 0.0							
	Adresy na platformie eNauczanie: Matematyka Dyskretna (Discrete Mathematics) 2021 - Moodle ID: 13200 https://enauczanie.pg.edu.pl/moodle/course/view.php?id=13200							
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study		SUM
	Number of study hours	30		4.0		66.0		100
Subject objectives	Getting familiar with the mathematical notation and techniques useful in discrete optimization.							

inderstands, to an advanced extent, the operation and evaluation criteria of data processing, storage and transfer methods, including computational algorithms, artificial intelligence and data mining       IK6_W01] Knows and understands, to an advanced extent, mathematics necessary to formulate and solve simple issues related to the field of study       Learns abou algorithmic and solve simple issues         related to the field of study       K6_K02] is ready to critically assess possessed knowledge and practical problems       Learns abou algorithmic and practical problems         IK6_U01] can apply mathematical knowledge to formulate and solve complex and non-typical problems related to the field of study and perform tasks, in an innovative way, in not entirely predictable conditions, by:n- appropriate selection of sources and information obtained from them, assessment, critical analysis and synthesis of this information, neelection and application of appropriate methods and toolsn         Subject contents       Algebra of sets         Logic: tautologies, predicates       Mathematical induction         Binary relations: equivalence relation, equivalence       Binary relations: partial order, Hasse diagrams	t numerous ispects of set theory, is and graph theory t numerous il models and their lications.	[SW1] Assessment of factual knowledge [SW1] Assessment of factual knowledge [SK2] Assessment of progress of work [SK5] Assessment of ability to solve problems that arise in practice [SU4] Assessment of ability to use methods and tools						
understands, to an advanced       algorithmic a         extent, mathematics necessary to       formulate and solve simple issues       combinatoric         related to the field of study       [K6_K02] is ready to critically       Learns abou         assess possessed knowledge and       adpractical problems       Learns abou         radical problems       [K6_U01] can apply mathematical       knows how it is non-typical problems         [K6_U01] can apply mathematical is now ratice and solve complex and non-typical problems       Knows how it is now ratice and solve is non-typical problems         related to the field of study and perform tasks, in an innovative way, in not entirely predictable conditions, by:n- appropriate selection of sources and information,n-selection and application of appropriate methods and toolsn       Subject contents         Subject contents       Algebra of sets       Logic: tautologies, predicates         Mathematical induction       Binary relations: equivalence relation, equivalence	t numerous al models and their dications.	knowledge [SK2] Assessment of progress of work [SK5] Assessment of ability to solve problems that arise in practice [SU4] Assessment of ability to						
assess possessed knowledge and acknowledge the importance of knowledge in solving cognitive and practical problems       mathematical practical app         [K6_U01] can apply mathematical knowledge to formulate and solve complex and non-typical problems related to the field of study and perform tasks, in an innovative way, in not entirely predictable conditions, by:n- appropriate selection of sources and information obtained from them, assessment, critical analysis and synthesis of this information of appropriate methods and toolsn       Knows how the selection of sources and information obtained from them, assessment, critical analysis and synthesis of this information of appropriate methods and toolsn         Subject contents       Algebra of sets         Logic: tautologies, predicates       Mathematical induction         Binary relations: equivalence relation, equivalence       Binary relations: partial order, Hasse diagrams	al models and their dications. to use in practice rom graph theory, set	work [SK5] Assessment of ability to solve problems that arise in practice [SU4] Assessment of ability to						
knowledge to formulate and solve complex and non-typical problems related to the field of study and perform tasks, in an innovative way, in not entirely predictable conditions, by:n- appropriate selection of sources and information obtained from them, assessment, critical analysis and synthesis of this information,n- selection and application of appropriate methods and toolsn       knowledge fo theory and of theory and of theory and of appropriate         Subject contents       Algebra of sets         Logic: tautologies, predicates         Mathematical induction         Binary relations: equivalence relation, equivalence         Binary relations: partial order, Hasse diagrams	om graph theory, set							
Logic: tautologies, predicates Mathematical induction Binary relations: equivalence relation, equivalenc Binary relations: partial order, Hasse diagrams								
Mathematical induction Binary relations: equivalence relation, equiivalenc Binary relations: partial order, Hasse diagrams								
Binary relations: partial order, Hasse diagrams								
	Binary relations: equivalence relation, equiivalence classes							
Binary relations: transitive closure, equivalence cl	Binary relations: partial order, Hasse diagrams							
	Binary relations: transitive closure, equivalence closure							
Counting: functions, configurations, partitions,								
Graph Theory: notation, basic terms								
Graph Theory: Eulerian graphs, Chinese Postman Problem								
Graph Theory: Hamiltonian graphs, Traveling Salesman Problem								
Graph Theory: properties of trees	Graph Theory: properties of trees							
Graph Theory: planarity								
Graph coloring								
Prerequisites and co-requisites								
Assessment methods Subject passing criteria Pas								
and criteria Written exam 51.0%	sing threshold	Percentage of the final grade
