

Subject card

Subject name and code	Selected Issues of Human Radiobiology, PG_00050106						
Field of study	Biomedical Engineering, Biomedical Engineering, Biomedical Engineering						
Date of commencement of studies	October 2020		Academic year of realisation of subject		2022/2023		
Education level	first-cycle studies		Subject group		Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	3		Language of instruction		Polish		
Semester of study	6		ECTS credits		1.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department of Atomic, Molecular and Optical Physics -> Faculty of Applied Physics and Mathematics						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. Paweł Możejko				
	Teachers		dr hab. Paweł Możejko				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	0.0	0.0	0.0	15
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	15		1.0		9.0	25
Subject objectives	To provide basic and fundamental information about physical methods used in radiobiology.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_W02] Knows and understands, to an advanced extent, selected laws of physics and physical phenomena as well as methods and theories explaining the complex relationships between them, constituting the basic general knowledge in the field of technical sciences related to the field of study		- Knowledge of the structure of matter at the level of elementary particles and atomic nucleus - Knowledge of radioactive decay - Knowledge of the interaction of ionizing radiation with matter - Knowledge about radiation interaction with cellular systems - Knowledge of methods for detection of ionizing radiation.		[SW1] Assessment of factual knowledge		
	[K6_W51] Knows and understands, to an advanced extent, selected aspects of human anatomy and physiology, constituting general knowledge related to the field of study		- Knowledge of the structure of matter at the level of elementary particles and atomic nucleus - Knowledge of radioactive decay - Knowledge of the interaction of ionizing radiation with matter - Knowledge about radiation interaction with cellular systems - Knowledge of methods for detection of ionizing radiation.		[SW1] Assessment of factual knowledge		
Subject contents	Lectures: The structure of matter Radioactive decays The interaction of the radioactive decay products with matter Ionizing radiation detectors Simple biological systems The effect of alpha radiation interaction with biological systems The effect of beta radiation interaction with biological systems The effect of gamma radiation interaction with biological systems Methods for study the interaction of the ionizing radiation with living organisms Direct effects of the ionizing radiation on cellular systems Indirect effects of the ionizing radiation on cellular systems Basic dosimetric quantities Determination of radiation doses Dosimetry of ionizing radiation Radiological protection Classes: The atomic nucleus Types of radioactive decay Law of radioactive decay Kinetics of radioactive decay The interaction of alpha radiation with matter The interaction of beta radiation and matter The interaction of gamma radiation with matter Basic biological systems. Effects of the interaction of ionizing radiation with bio-matter. Basic dosimetric quantities. Natural radioactivity in the environment Artificial radioactivity in the environment						
Prerequisites and co-requisites	No requirements						

Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
		50.0%	50.0%
	final exam	50.0%	50.0%
Recommended reading	Basic literature	Skrypt z materiałami do przedmiotu „Radiobiologia i Ochrona Radiologiczna” “Człowiek i promieniowanie jonizujące” Red. Z.A. Hryniewicz PWN Warszawa 2001	
	Supplementary literature	Jerzy Sobkowski „Chemia jądrowa” PWN Warszawa 1981 Wojciech Szymański „Chemia jądrowa” PWN Warszawa 1996	
	eResources addresses	Adresy na platformie eNauczanie: Wybrane zagadnienia radiobiologii człowieka 2022/2023 - Moodle ID: 28779 https://enauczanie.pg.edu.pl/moodle/course/view.php?id=28779	
Example issues/ example questions/ tasks being completed			
Work placement	Not applicable
