

## Subject card

Subject name and code	Mechatronics II, PG_00047619						
Field of study	Automatic Control, Cybernetics and Robotics						
Date of commencement of studies	October 2020	Academic year of realisation of subject			2022/2023		
Education level	first-cycle studies	Subject group			Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	3	Language of instruction			Polish		
Semester of study	6	ECTS credits			3.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of Mechanics and Mechatronics -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor	dr hab. inż. Rafał Hein					
	Teachers	dr hab. inż. Rafał Hein dr inż. Piotr Patrosz dr hab. inż. Ryszard Jasiński					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	15.0	15.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study		SUM
	Number of study hours	30	3.0		42.0		75
Subject objectives	The aim of the course is to acquire practical skills in designing and building hydraulic, pneumatic, electric, mechanical and mechatronic control systems. The subject consists of the design and laboratory parts. In the design part, students carry out assigned theoretical projects, and in the laboratory part, they carry out practical tasks for controlling mechatronic systems.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K6_W02] Knows and understands, to an advanced extent, selected laws of physics and physical phenomena as well as methods and theories explaining the complex relationships between them, constituting the basic general knowledge in the field of technical sciences related to the field of study	The student has knowledge in mechanics, construction and operation of machines, electronics, automation and control as well as understands the laws and phenomena occurring at the stage of operation of the products and production processes designed by him.			[SW1] Assessment of factual knowledge [SW2] Assessment of knowledge contained in presentation		
	[K6_W03] Knows and understands, to an advanced extent, the construction and operating principles of components and systems related to the field of study, including theories, methods and complex relationships between them and selected specific issues - appropriate for the curriculum	The student has the knowledge in mechanics, construction and operation of machines, electronics, automation and control enabling modeling and design of mechatronic systems.			[SW2] Assessment of knowledge contained in presentation [SW3] Assessment of knowledge contained in written work and projects		

Subject contents	<p>The design part includes the plan of mechatronic system.</p> <p>The following topics are realised in the laboratory part:</p> <p>Synthesis and analysis of combinational and sequential logical control systems.</p> <p>PLC programming in the application to the sequential control systems.</p> <p>Laboratory investigation of servo-mechanism with state variable feedback.</p> <p>Laboratory research of temperature control system using PID controller and D/A, A/D converter.</p> <p>PLC programming module of assembly system MAS-200.</p>											
Prerequisites and co-requisites	Ability to synthesize combinational and sequential control systems. Knowledge of languages and the basics of PLC and microcontroller programming. Basic knowledge of measurement systems, including the operation of physical quantity sensors and actuators.											
Assessment methods and criteria	<table border="1" data-bbox="451 723 1487 824"> <thead> <tr> <th data-bbox="451 723 794 757">Subject passing criteria</th> <th data-bbox="794 723 1137 757">Passing threshold</th> <th data-bbox="1137 723 1487 757">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="451 757 794 790">Practical exercise</td> <td data-bbox="794 757 1137 790">56.0%</td> <td data-bbox="1137 757 1487 790">50.0%</td> </tr> <tr> <td data-bbox="451 790 794 824">Project</td> <td data-bbox="794 790 1137 824">56.0%</td> <td data-bbox="1137 790 1487 824">50.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	Practical exercise	56.0%	50.0%	Project	56.0%	50.0%
Subject passing criteria	Passing threshold	Percentage of the final grade										
Practical exercise	56.0%	50.0%										
Project	56.0%	50.0%
