

Subject card

Subject name and code	Computer Game Design, PG_00047980							
Field of study	Informatics							
Date of commencement of studies	October 2020		Academic year of realisation of subject			2023/2024		
Education level	first-cycle studies		Subject group			Optional subject group		
						Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery			at the university		
Year of study	4		Language of instruction		Polish			
Semester of study	7		ECTS credits		4.0			
Learning profile	general academic profile		Assessment form		exam			
Conducting unit	Department of Intelligent Interactive Systems -> Faculty of Electronics, Telecommunications and Informatics							
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Mariusz Szwoch					
	Teachers		dr inż. Mariusz Szwoch					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Projec	oject Seminar		SUM
	Number of study hours	15.0	0.0	30.0	0.0		0.0	45
	E-learning hours included: 0.0							
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study		SUM
	Number of study hours	45		4.0		51.0		100
Subject objectives	Learning the basics, principles, methodology and technology of video game design based on modern graphic engines.							

Data wydruku: 10.04.2024 19:14 Strona 1 z 3

Learning outcomes	Course outcome	Subject outcome	Method of varification			
Learning outcomes	[K6_W41] Knows and	Subject outcome Shows the history of games	Method of verification			
	understands, to an advanced extent, the operation and evaluation criteria of data processing, storage and transfer methods, including computational algorithms, artificial intelligence and data mining	development and components of games engines.	[SW1] Assessment of factual knowledge			
	[K6_W05] Knows and understands, to an advanced extent, methods of supporting processes and functions, specific to the field of study	Student differenciates and characterises different genres of video games. Shows the history of games development and components of games engines.	[SW1] Assessment of factual knowledge			
	[K6_U43] can analyse date and formulate, apply and assess appropriate formal models and algorithms for solving problems in the field of information systems and applications	Student differenciates and characterises different genres of video games. Shows the history of games development and components of games engines.	[SU4] Assessment of ability to use methods and tools			
	[K6_U03] can design, according to required specifications, and make a simple device, facility, system or carry out a process, specific to the field of study, using suitable methods, techniques, tools and materials, following engineering standards and norms, applying technologies specific to the field of study and experience gained in the professional engineering environment	Student differenciates and characterises different genres of video games. Shows the history of games development and components of games engines.	[SU4] Assessment of ability to use methods and tools			
	[K6_W01] Knows and understands, to an advanced extent, mathematics necessary to formulate and solve simple issues related to the field of study	Shows the history of games development and components of games engines.	[SW1] Assessment of factual knowledge			
Subject contents	 Introduction Video games: definition, kinds, evolution history Basic video game concepts (goals and rules, gameplay, challanges and actions, game modes, balancing etc.) Video games genres Video games elements: core mechanics, user interface, interaction models and perspectives, gameplay modes, shell menus and screens Games hardware: PC, consoles, mobile devices Elements of game development process: player-centric approach, idea, project, scenario, plot, Game project documentation Design teams - tasks, members and their competences Artificial intelligence Types of game levels and their designing rules Interactivity and user interface Game Engines Sample game development environments (Unity Engine, Unreal Engine) Supporting tools, Speed Tree 					
Prerequisites and co-requisites	Computer Graphics - basic level					
	Multimedia and Interfaces					
Assessment methods	Subject passing criteria	Passing threshold	Percentage of the final grade			
and criteria	Practical exercise	51.0%	50.0%			
	Written exam	51.0%	40.0%			
	Presences and activity	51.0%	10.0%
