

Subject card

Subject name and code	Multimedia Services & Applications, PG_00047955						
Field of study	Informatics						
Date of commencement of studies	October 2020	Academic year of realisation of subject			2023/2024		
Education level	first-cycle studies	Subject group			Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	4	Language of instruction			Polish		
Semester of study	7	ECTS credits			3.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of Computer Communications -> Faculty of Electronics, Telecommunications and Informatics						
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. Michał Hoefft					
	Teachers	dr inż. Michał Hoefft					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	0.0	15.0	15.0	45
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	45		3.0		27.0	75
Subject objectives	The aim of the course is to give students possibility to acquire knowledge and practical skills related to the design and implementation of multimedia services and applications.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[K6_U04] can apply knowledge of programming methods and techniques as well as select and apply appropriate programming methods and tools in computer software development or programming devices or controllers using microprocessors or programmable elements or systems specific to the field of study	A student uses framework and monitoring tools for implementation of multimedia services in computer networks.	[SU5] Assessment of ability to present the results of task [SU1] Assessment of task fulfilment
	[K6_U03] can design, according to required specifications, and make a simple device, facility, system or carry out a process, specific to the field of study, using suitable methods, techniques, tools and materials, following engineering standards and norms, applying technologies specific to the field of study and experience gained in the professional engineering environment	A student uses framework and monitoring tools for implementation of multimedia services in computer networks.	[SU5] Assessment of ability to present the results of task [SU1] Assessment of task fulfilment
	[K6_W42] Knows and understands, to an advanced extent, architecture, design principles and methods of hardware and software support for local and distributed information systems, including computing systems, databases, computer networks and information applications, as well as the principles of human cooperation with computers and computer-aided teamwork	A student knows protocols used in multimedia systems.	[SW1] Assessment of factual knowledge
	[K6_W43] Knows and understands, to an advanced extent, standards and methods of IT systems administration, monitoring of processes occurring in them and immunising them to undesirable phenomena and activities	A student knows VoIP, conferencing systems and IPTV systems architectures.	[SW1] Assessment of factual knowledge
Subject contents	1. Multimedia and Multimedia Services, 2. Infrastructure for multimedia services, 3. Foundation of Coding and Compression of Voice Signals, 4. Foundation of Coding and Compression of Video Signals, 5. Signaling Protocols (Including SIP and SDP), 6. Transport Protocols (Including RTP), 7. Conferencing Services, 8. Video on Demand Services, 9. Examples of multimedia services vulnerabilities, 10. Security of Multimedia Services, 11. Requirements of Real-Time Applications, 12. Evaluation of Quality of Multimedia Service, 13. Practical aspects of multimedia data transmissions, 14. Multimedia application architecture, 15. Multimedia in web applications.		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	test	50.0%	33.0%
	project	50.0%	34.0%
	seminar	50.0%	33.0%
Recommended reading	Basic literature	Henryk Krawczyk, Sylwester Kaczmarek, Krzysztof Nowicki. (2018). Aplikacje i usługi a technologie sieciowe, Wydawnictwo Naukowe PWN 2018	
	Supplementary literature	Bruce Hartpence: Packet Guide to Voice over IP: A system administrator's guide to VoIP technologies, O'Reilly Media; 1 edition (2013) Sivannarayana Nagireddi: VoIP VOICE AND FAX SIGNAL PROCESSING, John Wiley & Sons, 2008	
	eResources addresses	Adresy na platformie eNauzanie:	

Example issues/ example questions/ tasks being completed	VoIP system architecture Multimedia services implementation Presentation of QoS mechanisms
Work placement	Not applicable
