

SDAŃSK UNIVERSITY 的 OF TECHNOLOGY

Subject card

Subject name and code	Diploma Interdisciplinary Consultations, PG_00052749								
Field of study	Architecture								
Date of commencement of studies	October 2020		Academic year of realisation of subject			2023/2024			
Education level	first-cycle studies		Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study			
Mode of study	Full-time studies		Mode of delivery			at the university			
Year of study	4		Language of instruction			Polish polish			
Semester of study	8		ECTS credits			3.0			
Learning profile	general academic profile		Assessment form			assessment			
Conducting unit	Department of Technical Fundamentals of Architecture Design -> Faculty of Architecture								
Name and surname of lecturer (lecturers)	Subject supervisor mgr inż. arch. Joanna Wojtas								
	Teachers		mgr inż. arch. Joanna Wojtas						
			dr inż. arch. Marek Sztafrowski						
			dr inż. arch. Michał Kwasek						
			mor inż Tomasz Zybała						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Projec	t	Seminar	SUM	
	Number of study 0.0 hours		0.0	0.0 30.0			0.0	30	
	E-learning hours included: 0.0								
Learning activity and number of study hours	Learning activity Participation ir classes includ plan		i didactic Participation in ed in study consultation hours		Self-study SUM				
	Number of study 30 hours			5.0		40.0		75	
Subject objectives	Development of a concept for the building structure for diploma project, in the scope of: refining the selected variant for the structural system, detailing the material and structural solutions for the adopted technology.								
Learning outcomes	Course out	Subject outcome			Method of verification				
	[K6_K04] is ready for lifelong learning, including second cycle and post-graduate studies or participation in other forms of education		is ready for lifelong learning			[SK5] Assessment of ability to solve problems that arise in practice			
	[K6_K71] is conscious of the need to apply knowledge from humanistic, social, economic or legal sciences in order to function in a social environment		is aware of the need to use the knowledge of specialists from industries cooperating with the architect			[SK5] Assessment of ability to solve problems that arise in practice			
Subject contents	Construction study in the scope of:								
	 - impacts on the object /loads/; - estimating the dimensions of the building's succestructure in relation to the adopted technology; 								
	- technical description relating to structure and construction solutions.								
Prerequisites and co-requisites	The study is prepared on a construction board approved during the undergraduate semester.								

Assessment methods	Subject passing criteria	Passing threshold	Percentage of the final grade			
and criteria		100.0%	80.0%			
		100.0%	20.0%			
Recommended reading	Basic literature	as above				
	Supplementary literature	as above				
	eResources addresses	Adresy na platformie eNauczanie:				
		Konsultacje dyplomowe sem. VIII 2024 r Moodle ID: 38635 https://enauczanie.pg.edu.pl/moodle/course/view.php?id=38635				
Example issues/ example questions/ tasks being completed	Development of a structural design, including a technical description in the field of: - structural system; - description od structure diagrams; - assumptions adopted for calculations (loads) and calculation results (dimensions of structural elements); - building and construction solutions; - geotechnical category and foundation of the building;					
Work placement	Not applicable
