

## Subject card

Subject name and code	Diploma Interdisciplinary Consultations, PG_00052515						
Field of study	Architecture						
Date of commencement of studies	October 2020	Academic year of realisation of subject			2023/2024		
Education level	first-cycle studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	4	Language of instruction			Polish polish		
Semester of study	8	ECTS credits			3.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of Technical Fundamentals of Architecture Design -> Faculty of Architecture						
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. Tomasz Falborski					
	Teachers	dr inż. Tomasz Falborski					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	0.0	30.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study		SUM
	Number of study hours	30	5.0		40.0		75
Subject objectives	Development of a concept for the building structure for diploma project, in the scope of: refining the selected variant for the structural system, detailing the material and structural solutions for the adopted technology.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K6_K71] is conscious of the need to apply knowledge from humanistic, social, economic or legal sciences in order to function in a social environment	is aware of the need to use the knowledge of specialists from industries cooperating with the architect			[SK5] Assessment of ability to solve problems that arise in practice		
	[K6_K04] is ready for lifelong learning, including second cycle and post-graduate studies or participation in other forms of education	is ready for lifelong learning			[SK5] Assessment of ability to solve problems that arise in practice		
Subject contents	Construction study in the scope of:  - impacts on the object /loads/;  - estimating the dimensions of the building's suocerstructure in relation to the adopted technology;  - technical description relating to structure and construction solutions.						
Prerequisites and co-requisites	The study is prepared on a construction board approved during the undergraduate semester.						
Assessment methods and criteria	Subject passing criteria	Passing threshold			Percentage of the final grade		
		100.0%			20.0%		
		100.0%			80.0%		
Recommended reading	Basic literature	as above					

	Supplementary literature	as above
	eResources addresses	Adresy na platformie eNauczanie:
Example issues/ example questions/ tasks being completed	Development of a structural design, including a technical description in the field of: - structural system; - description of structure diagrams; - assumptions adopted for calculations (loads) and calculation results (dimensions of structural elements); - building and construction solutions; - geotechnical category and foundation of the building;	
Work placement	Not applicable
