

## Subject card

Subject name and code	MATHEMATICS II, PG_00052599						
Field of study	Architecture						
Date of commencement of studies	October 2020	Academic year of realisation of subject			2020/2021		
Education level	first-cycle studies	Subject group			Obligatory subject group in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	1	Language of instruction			English		
Semester of study	2	ECTS credits			3.0		
Learning profile	general academic profile	Assessment form			exam		
Conducting unit	Faculty of Electronics, Telecommunications and Informatics						
Name and surname of lecturer (lecturers)	Subject supervisor	dr Magdalena Musielak					
	Teachers	dr Magdalena Musielak					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	30.0	0.0	0.0	0.0	45
	E-learning hours included: 0.0						
Adresy na platformie eNauczenie: WA - Architektura - Mathematics II 2020/21 (M.Musielak) - Moodle ID: 13335 <a href="https://enauczenie.pg.edu.pl/moodle/course/view.php?id=13335">https://enauczenie.pg.edu.pl/moodle/course/view.php?id=13335</a>							
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study	SUM	
	Number of study hours	45	5.0		25.0	75	
Subject objectives	Students obtain competence in using methods of mathematical analysis (single variable calculus) and knowledge how to solve simple problems that are found in the field of engineering, in particular connected to data engineering.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K6_U04] is able to use analytical methods to formulate and solve project tasks	Student applies the concepts of limit, continuity, and derivatives of functions to solve curve sketching problems. Student uses definite integral to solve geometrical problems			[SU4] Assessment of ability to use methods and tools		
	[K6_W01] knows and understands construction problems, building and engineering issues related to building design; principles, solutions, constructions and building materials used in simple engineering tasks in the field of architectural and urban design	Student defines basic concepts of differential and integral calculus on single-variable function. Student gives the graphical interpretation of definite integral. Student lists geometrical applications of definite integrals			[SW1] Assessment of factual knowledge		

Subject contents	<ul style="list-style-type: none"> <li>• Partial derivatives</li> <li>• Double integral over a rectangular region. Change of variables in double integral. Applications</li> <li>• Continuity.</li> <li>• Derivative of a function of one variable. Geometrical and physical interpretation. Basic differentiation formulas.</li> <li>• Product, quotient, and chain rules.</li> <li>• Applications of differentiation. Optimization. Concavity.</li> <li>• Indefinite integral. Basic formulas. Integration by parts, by substitution</li> <li>• Definite integral. Geometrical interpretation. Fundamental Theorem of Calculus.</li> <li>• Geometrical applications of definite integrals: areas, volumes, lengths.</li> <li>• Partial derivatives</li> <li>• Double integral over rectangular and normal regions. Change of variables in double integral. Applications</li> </ul>		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Final Exam	50.0%	80.0%
	Homework assignments	0.0%	20.0%
Recommended reading	Basic literature	<ul style="list-style-type: none"> <li>• H. Anton, <i>Calculus with analytic geometry</i>, John Wiley &amp; Sons, 1989.</li> <li>• <i>Matematyka. Podstawy z elementami matematyki wyższej</i>, edited by B. Wikieł, PG publishing house</li> <li>• J.Dymkowska, D.Beger, <i>Rachunek różniczkowy w zadaniach</i>, PG publishing house</li> <li>• J.Dymkowska, D.Beger, <i>Rachunek całkowy w zadaniach</i>, PG publishing house</li> </ul>
