

## SDAŃSK UNIVERSITY 的 OF TECHNOLOGY

## Subject card

Subject name and code	Theory of architectural design II. Elements of ergonomy, PG_00052606								
Field of study	Architecture								
Date of commencement of studies	October 2020		Academic year of realisation of subject			2020/2021			
Education level	first-cycle studies		Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study			
Mode of study	Full-time studies		Mode of delivery			at the university			
Year of study	1		Language of instruction			English			
Semester of study	2		ECTS credits			1.0			
Learning profile	general academic profile		Assessment form			assessment			
Conducting unit	Department of Residential Architecture -> Faculty of Architecture								
Name and surname of lecturer (lecturers)	Subject supervisor	dr hab. inż. arch. Jacek Krenz							
	Teachers dr hab. inż. arch. Jacek Krenz								
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Projec	t	Seminar	SUM	
	Number of study hours	15.0	0.0	0.0	0.0	0.0		15	
	E-learning hours included: 0.0								
	Adresy na platformie eNauczanie:								
classes		Participation in classes include plan				Self-study		SUM	
	Number of study hours	15		1.0		9.0		25	
Subject objectives	The aim of the course topic drawn in the for technique and anthro will be useful for design	m of an ideogra pometry is nec	am.In order to essary. Theref	design a prope fore these issue	r archite es will be	ctural s	space, knowle	edge of	

_earning outcomes Course outcome		Method of verification				
history and theory of architecture as well as art, technology and humanities to the extent necessary for the proper performance of architectural designs; issues related to architecture and urban planning useful for the design of architectural objects and urban complexes in the context of socia cultural, natural, historical, economic, legal and other non-		[SW1] Assessment of factual knowledge				
[K6_K03] is ready to take responsibility for architectural and urban values in environmental protection and cultural heritage	is ready to take into account architectural and urban values in the protection of the environment and cultural heritage	[SK4] Assessment of communication skills, including language correctness				
[K6_W04] knows and understands relations between man and architecture and between architecture and the surrounding environment, and the need to adapt architecture to human needs and scale; problems of physics, technology and functions of buildings to the extent that ensures comfort of use and protection against the effects of weather; methods and means of implementing environmentally responsible sustainable design as well as protection and conservation of the surrounding environment	knows and understands the relations between man and architecture and between architecture and the surrounding environment, and the need to adapt architecture to human needs and scale to the extent that it is possible to ensure the comfort of their use and protection against weather conditions	[SW1] Assessment of factual knowledge
