

Subject card

Subject name and code	Construction project II, PG_00052790						
Field of study	Architecture						
Date of commencement of studies	October 2020	Academic year of realisation of subject			2021/2022		
Education level	first-cycle studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			Polish		
Semester of study	4	ECTS credits			3.0		
Learning profile	general academic profile	Assessment form			exam		
Conducting unit	Department of Technical Fundamentals of Architecture Design -> Faculty of Architecture						
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. arch. Marek Sztafrowski					
	Teachers	dr inż. arch. Stefan Niewitecki dr inż. Monika Zielińska dr inż. Karol Grębowski dr inż. arch. Bogusława Konarzewska dr inż. arch. Marek Sztafrowski					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	0.0	45.0	0.0	45
	E-learning hours included: 0.0						
	Address on the e-learning platform: https://enauczanie.pg.edu.pl/moodle/course/view.php?id=20016 Adresy na platformie eNauczanie:						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM		
	Number of study hours	45	6.0	24.0	75		
Subject objectives	Learning about technical issues related to the implementation of a construction design, technical design.						
	Understanding the basic issues related to reinforced concrete and masonry structures, knowledge of the relationship between loads and stresses and deformations in simple elements made of reinforced concrete.						
Learning outcomes	Course outcome	Subject outcome	Method of verification				
	[K6_U02] is able to design an architectural object or a simple urban complex that meets the aesthetic and technical requirements	is able to design an architectural object or a simple urban complex that meets the aesthetic and technical requirements	[SU1] Assessment of task fulfilment [SU3] Assessment of ability to use knowledge gained from the subject [SU5] Assessment of ability to present the results of task				
	[K6_W01] knows and understands construction problems, building and engineering issues related to building design; principles, solutions, constructions and building materials used in simple engineering tasks in the field of architectural and urban design	knows and understands construction problems, building and engineering issues related to building design; principles, solutions, constructions and building materials used in simple engineering tasks in the field of architectural design	[SW3] Assessment of knowledge contained in written work and projects [SW1] Assessment of factual knowledge				

Subject contents	<p>Basic issues related to reinforced concrete and masonry structures.</p> <p>Pre-design work.</p> <p>Architectural and construction project.</p>		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Structure elements projekct	100.0%	50.0%
	Building elements project	100.0%	50.0%

	eResources addresses		

Example issues/ example questions/ tasks being completed	Presentation linked to use of technology in architectural design, related to the implementation of a construction design, technical design.
Work placement	Not applicable
