

Subject card

Subject name and code	Theory of architectural design IV, PG_00052632										
Field of study	Architecture										
Date of commencement of studies	October 2020	Academic year of realisation of subject		2021/2022							
Education level	first-cycle studies		Subject group		Obligatory subject group in the field of study Subject group related to scientific research in the field of study						
Mode of study	Full-time studies		Mode of delivery		at the university						
Year of study	2	Language of instruction		Polish polski							
Semester of study	4	ECTS credits		1.0							
Learning profile	general academic profile		Assessment form		exam						
Conducting unit	Department of Residential Architecture -> Faculty of Architecture										
Name and surname of lecturer (lecturers)	Subject supervisor		dr Najmeh Hassas								
	Teachers		dr Najmeh Hassas								
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM				
	Number of study hours	15.0	0.0	0.0	0.0	0.0	15				
	E-learning hours included: 0.0										
	Adresy na platformie eNauczanie:										
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM				
	Number of study hours	15		1.0		9.0	25				
Subject objectives	A.awareness:needs and expectations of the recipient in relations with space for a specific function, shaping the architecture and form of multi-family residential houses, the specifics of the housing environment, main functions, connections, zones and shaping B.knowledge: general principles and procedures in the process of designing residential architecture, issues of multi-family housing design C.understanding: contemporary trends and trends in design solutions for multi-family residential buildings D.skills: efficient processing, generalization and use of acquired information										
Learning outcomes	Course outcome		Subject outcome			Method of verification					
	[K6_W06] knows and understands the nature of the architect's profession and its role in society; main principles of professional presentation of architectural and urban concepts		knows and understands the nature of the architect's profession and its role in society; main principles of professional presentation of architectural and urban concepts			[SW1] Assessment of factual knowledge					
	[K6_W03] knows and understands history and theory of architecture as well as art, technology and humanities to the extent necessary for the proper performance of architectural designs; issues related to architecture and urban planning useful for the design of architectural objects and urban complexes in the context of social, cultural, natural, historical, economic, legal and other non-technical conditions of engineering activities, integrating knowledge acquired during studies;		knows and understands theory of architecture to the extent necessary for the proper performance of architectural designs; issues related to architecture and urban planning useful for the design of architectural objects and urban complexes in the context of economic, legal and other non-technical conditions of engineering activities, integrating knowledge acquired during studies;			[SW1] Assessment of factual knowledge					

Subject contents	<p>1/2 - Introduction to topic; Legal conditions.</p> <p>3/4 - Types of multi-family residential buildings and their functional-spatial layout.</p> <p>5/6 - Types of multi-family residential development.</p> <p>7/8 - Design of apartments and key functional elements in multi-family buildings.</p> <p>9/10 - Investor structure versus optimization and spatial expression of residential investment.</p> <p>11/12 - Creative attitudes of architects and spatial expression of multifamily residential buildings.</p> <p>13/14 - The role of place and time in architecture.</p> <p>15 - Summary of lecture topics; Exam information.</p>						
Prerequisites and co-requisites	No requirements
