

Subject card

Subject name and code	Urban Design and Planning Project III, PG_00052810						
Field of study	Architecture						
Date of commencement of studies	October 2020		Academic year of realisation of subject		2022/2023		
Education level	first-cycle studies		Subject group		Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	3		Language of instruction		Polish		
Semester of study	5		ECTS credits		4.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department of Urban Design and Regional Planning -> Faculty of Architecture						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. inż. arch. Justyna Martyniuk-Pęczek				
	Teachers		dr hab. inż. arch. Dorota Kamrowska-Załużska dr inż. arch. Anna Rubczak dr inż. arch. Magdalena Rembeza dr inż. arch. Łukasz Bugalski dr hab. inż. arch. Justyna Martyniuk-Pęczek dr inż. arch. Piotr Smolnicki dr inż. arch. Roman Ruczyński dr inż. arch. Izabela Burda				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM

	E-learning hours included: 0.0						
	Additional information:						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	45		8.0		47.0	100
Subject objectives	The aim of the course is to acquire learning outcomes and the ability to design complex urban structures in urban areas. (projects). The essence of the project in this semester is to familiarize students with the subject of planning cities and housing estates, in line with the idea of "WALKABLE CITIES" "COMPACT CITIES".						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[K6_K01] is ready to comply with the principles of professional ethics and take responsibility for his/her actions	is ready to comply with the principles of professional ethics and take responsibility for his/her actions	[SK5] Assessment of ability to solve problems that arise in practice
	[K6_U71] is able to apply knowledge from humanistic, social, economic or legal sciences in order to solve problems in a social environment	Can solve the most common problems related to the profession of an architect, correctly identifies and resolves dilemmas related to this profession, performs risk assessment and is able to assess the effects of the performed activity in the field of the architect profession	[SU5] Assessment of ability to present the results of task
	[K6_U01] is able to use the experience gained during studies to critically analyze the conditions and formulate conclusions for design in an interdisciplinary context	is able to use the experience gained during studies to critically analyze the conditions and formulate conclusions for design in an interdisciplinary context	[SU3] Assessment of ability to use knowledge gained from the subject
	[K6_W06] knows and understands the nature of the architect's profession and its role in society; main principles of professional presentation of architectural and urban concepts	knows and understands the nature of the architect's profession and its role in society; main principles of professional presentation of architectural and urban concepts	[SW1] Assessment of factual knowledge
	[K6_K03] is ready to take responsibility for architectural and urban values in environmental protection and cultural heritage	is ready to take responsibility for architectural and urban values in environmental protection and cultural heritage	[SK5] Assessment of ability to solve problems that arise in practice
Subject contents	<p>Designing studio, lessons: Urban design. Downtown area.</p> <p>Design of a housing and service complex. Proportions between individual elements should be selected after careful analysis of the spatial context and findings of the SUIKZP Study. The concept of development of the area covered by the study together with the analysis of the project's compliance with the Local Development Plan. Determination of detailed urban parameters for the selected quarter. ANALYTICAL PART - analysis of a selected part of the city - building an urban program. PROJECT PART - shaping a residential and service complex. The project is devoted to the problem of entering the housing and service complex into the urban context as an element of the urban re-urbanization and revitalization process.</p>		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Score from seminar	60.0%	10.0%
	Score from design project	60.0%	90.0%
