|   | Number of study hours   | 15.0   | 0.0                                 | 0.0        | 0.0  | 0.0     | 15  |
|   | E-learning hours included: 15.0   |  |                                     |            |  |         |     |
| Learning activity and number of study hours | Learning activity   | Participation in didactic classes included in study plan   | Participation in consultation hours |            | Self-study   |         | SUM |
|   | Number of study hours   | 15   | 1.0                                 |            | 9.0  |         | 25  |
| Subject objectives                          | The aim of the subject is to familiarize students with the basic issues of contemporary urban planning, including the problems of transforming downtown structures.   |  |                                     |            |  |         |     |
| Learning outcomes                           | Course outcome  | Subject outcome  |                                     |            | Method of verification   |         |     |
|   | [K6_W06] knows and understands the nature of the architect's profession and its role in society; main principles of professional presentation of architectural and urban concepts   | knows and understands the nature of the architect's profession and its role in society; main principles of professional presentation of architectural and urban concepts   |                                     |            | [SW1] Assessment of factual knowledge  |         |     |
|   | [K6_W03] knows and understands history and theory of architecture as well as art, technology and humanities to the extent necessary for the proper performance of architectural designs; issues related to architecture and urban planning useful for the design of architectural objects and urban complexes in the context of social, cultural, natural, historical, economic, legal and other non-technical conditions of engineering activities, integrating knowledge acquired during studies; | knows and understands history and theory of architecture to the extent necessary for the proper performance of architectural designs; issues related to architecture and urban planning useful for the design of architectural objects and urban complexes in the context of social, cultural, natural, historical, economic, legal and other non-technical conditions of engineering activities, integrating knowledge acquired during studies; |                                     |            | [SW1] Assessment of factual knowledge  |         |     |

|  |  |   |                               |
|--|--|---|-------------------------------|
| Subject contents   | Introduction to the basic trends and definitions used in the practice of designing public spaces. Functional areas of public space. In addition, the subject introduces issues related to the functioning of the downtown city at night and the activation of the city center after dark. Contemporary housing issues in the context of downtown areas. Neighborhood planning process - shaping the quality of life in the context of global development |   |                               |
| Prerequisites and co-requisites                                |  |   |                               |
| Assessment methods and criteria                                | Subject passing criteria   | Passing threshold   | Percentage of the final grade |
|  | Score from the final exam  | 60.0%   | 100.0%                        |
