

Subject card

Subject name and code	Theory of urbanism IV, PG_00052814						
Field of study	Architecture						
Date of commencement of studies	October 2020		Academic year of realisation of subject		2022/2023		
Education level	first-cycle studies		Subject group		Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery		e-learning		
Year of study	3		Language of instruction		Polish		
Semester of study	6		ECTS credits		1.0		
Learning profile	general academic profile		Assessment form		exam		
Conducting unit	Department of Urban Design and Regional Planning -> Faculty of Architecture						
Name and surname of lecturer (lecturers)	Subject supervisor		prof. dr hab. inż. arch. Aleksandra Sas-Bojarska				
	Teachers		prof. dr hab. inż. arch. Aleksandra Sas-Bojarska				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	0.0	0.0	0.0	15
	E-learning hours included: 15.0						
	Additional information:						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	15		1.0		9.0	25
Subject objectives	To acquaint students with the problems of planning and designing the development of complex urban organisms, taking into account the existing conditions and potentials, tested on various scales. Transfer of knowledge related to systemic and integrated planning and urban design of multifunctional urban complexes. Transfer of knowledge about the latest challenges, requirements and trends in urban planning. Outlining the basics of spatial planning on a commune scale.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_U01] is able to use the experience gained during studies to critically analyze the conditions and formulate conclusions for design in an interdisciplinary context		The student has basic knowledge of the comprehensive analysis of conditions and pro-ecological design of urban structures in an interdisciplinary approach.		[SU3] Assessment of ability to use knowledge gained from the subject		
	[K6_W03] knows and understands history and theory of architecture as well as art, technology and humanities to the extent necessary for the proper performance of architectural designs; issues related to architecture and urban planning useful for the design of architectural objects and urban complexes in the context of social, cultural, natural, historical, economic, legal and other non-technical conditions of engineering activities, integrating knowledge acquired during studies;		The student has a basic knowledge of the features and functional and spatial structure of the city. He knows the main conditions and principles of shaping urban structures in the spirit of sustainable development. Distinguishes contemporary phenomena, problems and trends in urban development. Has a basic knowledge of spatial planning in the city.		[SW1] Assessment of factual knowledge		
Subject contents	The course covers Theory of Urban Design IV (lectures, 15 hours). As part of the lectures, students will learn about the theoretical foundations of urban planning and the challenges, problems and trends in designing complex urban structures on various scales, with the need for a systemic and interdisciplinary approach. They learn basic information about spatial planning at the commune level.						

Prerequisites and co-requisites
