and number of study hours	Learning activity and number of study hours	Learning activity	classes incluc		Participation in consultation hours		Self-study		SUM	
Number of study 60 9.0 56.0 125			60		9.0		56.0		125	
Subject objectives The aim of the course is:	Subject objectives									
- introduction of concepts defining the space		- introduction of concepts defining the space								
- explanation of relationships taking place in space		- explanation of relationships taking place in space								
- spatial and graphic interpretation of definitions defining spatial relations.		- spatial and graphic interpretation of definitions defining spatial relations.								

Learning outcomes	Course outcome	Subject outcome	Method of verification					
	[K6_U03] is able to prepare a graphic, written and oral presentation of your own design concepts in the field of architecture and urban planning, meeting the requirements of a professional record appropriate for architectural and urban design	- prepares a presentation and presents his work in 2-D and 3-D - selects and composes boards on which the object is presented	[SU3] Assessment of ability to use knowledge gained from the subject					
	[K6_U02] is able to design an architectural object or a simple urban complex that meets the aesthetic and technical requirements	- makes drawings showing the designed form - makes a spatial model	[SU2] Assessment of ability to analyse information					
Subject contents	Design: Practical knowledge of the basic concepts and issues of architectural composition.							
	Creating flat and spatial compositions illustrating relationships that take place in space.							
	Transformation of a simple spatial form and save its as a drawing.							
Prerequisites and co-requisites								
Assessment methods	Subject passing criteria	Passing threshold	Percentage of the final grade					
and criteria	project - assessment of individual project tasks	50.0%	50.0%					
	project - evaluation of the presentation of individual project tasks	50.0%	50.0%
