

Subject card

Subject name and code	Waves and optics, PG_00020718						
Field of study	Technical Physics						
Date of commencement of studies	October 2020	Academic year of realisation of subject			2021/2022		
Education level	first-cycle studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			blended-learning		
Year of study	2	Language of instruction			Polish		
Semester of study	3	ECTS credits			5.0		
Learning profile	general academic profile	Assessment form			exam		
Conducting unit	Department of Physics of Electronic Phenomena -> Faculty of Applied Physics and Mathematics						
Name and surname of lecturer (lecturers)	Subject supervisor	dr hab. inż. Jędrzej Szmytkowski					
	Teachers	dr hab. inż. Jędrzej Szmytkowski					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	30.0	0.0	0.0	0.0	60
	E-learning hours included: 30.0						
	Address on the e-learning platform: https://enauczanie.pg.edu.pl/moodle/course/view.php?id=18863 Adresy na platformie eNauczanie:						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM		
	Number of study hours	60	5.0	60.0	125		
Subject objectives	Teach students and strengthen their knowledge about the nature of mechanical and electromagnetic waves, their generation, theoretical models and applications. Special attention is paid to optical waves and laws of optical geometry.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	K6_W01	Student knows how to separate wave phenomena in daily life			[SW1] Assessment of factual knowledge		
	K6_W02	The knowledge allows to analyze problems concerning waves and optics in the real world			[SW1] Assessment of factual knowledge		
	K6_U01	Student knows how to use literature and databases in waves and optics			[SU2] Assessment of ability to analyse information		

Subject contents	<p>Vibrations of simple physical systems: Basic concepts. Transversal and longitudinal vibrations of the weight-spring system. Harmonic oscillator. Mathematical and physical pendulum. Harmonic damped oscillator. Forced vibrations. Resonance. Vibrations in electrical systems on the example of RLC circuits. Complex vibrations. Beats. Vibrations with two degrees of freedom. Waves - basic concepts. Wave equation. The propagation of waves in various mechanical systems (rod, liquid, gas). A homogeneous string, the equation of the string. Reflection and transmission of the wave at the border of two materials. Wave impedance. Interference. Standing waves. Wave packets. Phase and group speed. Dispersions. Fourier analysis and its use in the theory of vibrations and waves. Elements of acoustics. Doppler effect. Electromagnetic waves, basic concepts. The spectrum of electromagnetic waves. Maxwell's equations. Wave equation for electromagnetic waves. The refractive index of the waves. Dependence of refractive index on frequency. Impedance of the electromagnetic wave. Poynting's vector. Polarization of waves - theoretical description and experimental methods of polarity study. Brewster angle. Fresnel equations. The phenomenon of interference of electromagnetic waves. Diffraction. The diffraction image of a single slit. Diffraction grating. Geometric optics: Fermat's principle. Snellius's law. Total internal reflection. Mirror. Prisms. Lens. Optical instruments. Photometric units.</p> <p>EXERCISES: Examples illustrating the phenomena discussed in the lecture.</p>														
Prerequisites and co-requisites	Course credit "Mechanics and heat"(07053) and "Mathematical analysis" (07053)														
Assessment methods and criteria	<table border="1" data-bbox="448 714 1489 853"> <thead> <tr> <th data-bbox="448 714 794 745">Subject passing criteria</th> <th data-bbox="794 714 1141 745">Passing threshold</th> <th data-bbox="1141 714 1489 745">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="448 745 794 777">Oral exam</td> <td data-bbox="794 745 1141 777">35.0%</td> <td data-bbox="1141 745 1489 777">30.0%</td> </tr> <tr> <td data-bbox="448 777 794 808">Written exam</td> <td data-bbox="794 777 1141 808">65.0%</td> <td data-bbox="1141 777 1489 808">30.0%</td> </tr> <tr> <td data-bbox="448 808 794 853">Midterm colloquium</td> <td data-bbox="794 808 1141 853">45.0%</td> <td data-bbox="1141 808 1489 853">40.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	Oral exam	35.0%	30.0%	Written exam	65.0%	30.0%	Midterm colloquium	45.0%	40.0%
Subject passing criteria	Passing threshold	Percentage of the final grade													
Oral exam	35.0%	30.0%													
Written exam	65.0%	30.0%													
Midterm colloquium	45.0%	40.0%
