

Subject card

Subject name and code	Vibrations and wave phenomena laboratory , PG_00037301								
Field of study	Technical Physics								
Date of commencement of studies	October 2020		Academic year of realisation of subject			2021/2022			
Education level	first-cycle studies		Subject group			Optional subject group Subject group related to scientific research in the field of study			
Mode of study	Full-time studies		Mode of delivery			at the university			
Year of study	2		Language of instruction			Polish			
Semester of study	4		ECTS credits			2.0			
Learning profile	general academic profile		Assessment form			assessment			
Conducting unit	Zakład Fizyki Zderze Physics and Mathem	ń Elektronowyo atics	ch -> Instytut F	izyki i Informat	yki Stoso	owanej	-> Faculty of	Applied	
Name and surname	Subject supervisor		dr inż. Piotr Grygiel						
of lecturer (lecturers)	Teachers		dr inż. Piotr Grygiel						
Lesson types and methods	Lesson type	Lecture	Tutorial	Laboratory	Projec	oject Semir		SUM	
of instruction	Number of study hours	0.0	0.0	30.0	0.0	0.0		30	
	E-learning hours included: 0.0								
	Adresy na platformie eNauczanie: Laboratorium Drgań i Zjawisk Falowych - Moodle ID: 23486 https://enauczanie.pg.edu.pl/moodle/course/view.php?id=23486								
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study		SUM	
	Number of study hours	30		2.0		18.0		50	
Subject objectives	Utilisation of the knowledge of physics of oscillations and waves in order to perform an experiment. Ability to plan and perform the measurements of physical quantities. Ability to elaborate and present in written form the results of measurements.							iment.	

Data wydruku: 04.05.2024 09:57 Strona 1 z 2

construction and principles of knowledge	ual ual						
and performing of an experiment in physics of oscillations and waves. Is able to analyse critically the results of such experiment. K6_W12 Knows the principal work safety regulations in physics laboratory, in particular during measurements of electric-, optical- and acoustic quantities. K6_U04 Is able to plan and perform experiments on physics of waves and oscillations. Is able to analyse critically the results of own measurements and to draw conclusions. Possesses experience of laboratory work. K6_W07 Possesses the basic knowledge of construction and principles of knowledge	ual ty to

construction and principles of knowledge	ual						
working of measuring devices of electric-, optical- and acoustic quantities.	[SW1] Assessment of factual knowledge						
Subject contents The Set of Experiments: 1. Investigation of vibrations of a string. 2. Determination of the speed of so air with the use of Quincke interferometer. 3. Determination of the light wavelength with the use of Minterferometer. 4. Investigation of light polarization by a quarter-wave plate. 5. Investigation of a serial parallel RLC circuits. 6. Investigation of a steady-state in a sinusoidally-excited transmission line. 7. Investigation of propagation of pulses in a transmission line. 8. Investigation of single- and coupled resonance circuits. 9. Determination of the radius of a curvature of a lens by means of Newton rings Investigation of electron diffraction.	lichelson al- and						
Prerequisites and co-requisites 1. Knowledge of wave physics. 2. Knowledge of physics of mechanical and electrical oscillations. 3. knowledge of theory of electric ciruits (incl. ac-circuits). 4. Basic knowledge of theory of transmissic 4. Basic knowledge of optics. 5. Integral and differential calculus skills.							
Assessment methods Subject passing criteria Passing threshold Percentage of the final	grade						
and criteria Credit for the theory of each experiment 50.0%							
Acceptance of reports onseven experiment according to schedule
