| Adresy na platformie eNauczanie:<br>Elektrodynamika 2021/2022 - Nowy - Moodle ID: 20283<br><a href="https://enauczanie.pg.edu.pl/moodle/course/view.php?id=20283">https://enauczanie.pg.edu.pl/moodle/course/view.php?id=20283</a> |  |   |                                     |            |  |         |     |
| Learning activity and number of study hours  | Learning activity  | Participation in didactic classes included in study plan  | Participation in consultation hours | Self-study | SUM  |         |     |
|  | Number of study hours  | 60  | 5.0                                 | 60.0       | 125  |         |     |
| Subject objectives   | Understand electrodynamics basics  |   |                                     |            |  |         |     |
| Learning outcomes  | Course outcome   | Subject outcome   |                                     |            | Method of verification   |         |     |
|  | K6_U02   | Student is able to use appropriate tools to solve basic problems in the field of electrodynamics. |                                     |            | [SU2] Assessment of ability to analyse information<br>[SU1] Assessment of task fulfilment    |         |     |
|  | K6_W02   | Well-organized knowledge of electrodynamics basics.   |                                     |            | [SW1] Assessment of factual knowledge  |         |     |
| Subject contents   | Electrostatics in vacuum. Scalar potential. Boundary conditions. Gauss law. Poisson, Laplace equations. Multipole expansion. Electric field in medium. Boundary conditions. Anisotropic dielectrics. Stationary magnetic field in vacuum. Ampere's law. Vector potential, Poisson equation. Biot-Savart law. Continuity equation. Magnetic moment. Magnetostatics in medium. Boundary conditions. Anisotropic magnetics. Law of e-m induction. Maxwell's equations. Potentials of e-m field. Gauging. D'Alembert equation. Energy density and flux. Poynting vector. E-m field momentum. Maxwell stress tensor. E-m waves in homogenous and isotropic media. Monochromatic plane wave. Polarisation. Plane e-m wave in a conducting medium. Reflection and refraction. |   |                                     |            |  |         |     |
| Prerequisites and co-requisites  |  |   |                                     |            |  |         |     |
| Assessment methods and criteria  | Subject passing criteria   | Passing threshold   |                                     |            | Percentage of the final grade  |         |     |
|  | Written exam   | 50.0%   |                                     |            | 50.0%  |         |     |
|  | Practical exercise   | 50.0%   |                                     |            | 50.0%  |         |     |

|  |                          |  |
