

## Subject card

Subject name and code	Environmental physics, PG_00037295						
Field of study	Technical Physics						
Date of commencement of studies	October 2020	Academic year of realisation of subject			2021/2022		
Education level	first-cycle studies	Subject group			Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			Polish		
Semester of study	3	ECTS credits			2.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of Atomic, Molecular and Optical Physics -> Faculty of Applied Physics and Mathematics						
Name and surname of lecturer (lecturers)	Subject supervisor	dr hab. Mateusz Zawadzki					
	Teachers	dr hab. Mateusz Zawadzki					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	0.0	0.0	0.0	30
	E-learning hours included: 0.0						
Adresy na platformie eNauczanie: Fizyka środowiska [FSIOZE_1001] - Moodle ID: 18839 <a href="https://enauczanie.pg.edu.pl/moodle/course/view.php?id=18839">https://enauczanie.pg.edu.pl/moodle/course/view.php?id=18839</a>							
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM		
	Number of study hours	30	2.0	18.0	50		
Subject objectives	Environmental Physics course familiarizes students with the following topics:  Renewable Energy, Physics of Earth and Sun, Earth climate, acoustics and noise, environment studies etc.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	K6_K01	The student obtains knowledge on the subject of selected environmental measurements, understands environmental problems and is aware of the potential challenges, in present and future, related to the environment. The student understands the need to constantly expand his competences and knowledge in the subject of environmental physics in the rapidly changing conditions of the modern world.			[SK2] Assessment of progress of work		
	K6_W02	The student has knowledge in the field of renewable energy physics and methods of their applications, climate physics, astronomy, the basics of acoustics, photovoltaic processes, seismology and other physical issues related to the environment in which he normally resides.			[SW1] Assessment of factual knowledge		

Subject contents	<p>Energy, energy costs, renewable energy, sources of energy</p> <p>Temperature, heat, laser cooling</p> <p>Hydroenergy, wind energy, tides energy</p> <p>Energy of oceans, streams, marethermal energy, geothermal energy</p> <p>Sun, its structure, nuclear processes in the Sun, radiation energy, greenhouse effect</p> <p>Physics of Earth</p> <p>Nuclear energy</p> <p>Photovoltaics, basics, novel design of PV cells</p> <p>Earth energy budget (balance)</p> <p>Enviromental studies</p> <p>Noise</p> <p>Astronomy</p>											
Prerequisites and co-requisites												
Assessment methods and criteria	<table border="1"> <thead> <tr> <th data-bbox="448 1099 798 1137">Subject passing criteria</th> <th data-bbox="798 1099 1141 1137">Passing threshold</th> <th data-bbox="1141 1099 1485 1137">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="448 1137 798 1173"></td> <td data-bbox="798 1137 1141 1173">50.0%</td> <td data-bbox="1141 1137 1485 1173">100.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade		50.0%	100.0%			
Subject passing criteria	Passing threshold	Percentage of the final grade										
	50.0%	100.0%
