

Subject card

Subject name and code	Techniques for creating web pages, PG_00051070						
Field of study	Technical Physics						
Date of commencement of studies	October 2020	Academic year of realisation of subject			2022/2023		
Education level	first-cycle studies	Subject group			Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	3	Language of instruction			Polish		
Semester of study	5	ECTS credits			3.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Zakład Fizyki Teoretycznej i Informatyki Kwantowej -> Instytut Fizyki i Informatyki Stosowanej -> Faculty of Applied Physics and Mathematics						
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. Paweł Syty					
	Teachers	dr inż. Paweł Syty					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	0.0	30.0	0.0	45
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study	SUM	
	Number of study hours	45	5.0		25.0	75	
Subject objectives	To acquaint students with the basic methods of creating websites.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	K6_K01	The student is aware of changes in technology and the need for training.			[SK5] Assessment of ability to solve problems that arise in practice		
	K6_U03	The student is able to independently prepare a website on a selected topic, using selected technologies and tools.			[SU4] Assessment of ability to use methods and tools [SU3] Assessment of ability to use knowledge gained from the subject [SU1] Assessment of task fulfilment		
	K6_U02	The student is able to analyze the problem to be solved and solve it.			[SU1] Assessment of task fulfilment [SU2] Assessment of ability to analyse information		

Subject contents	<p>LECTURE Web standards, website availability (WCAG, ATAG) HTML 5 (with particular emphasis on what's new in relation to older versions) CSS - Cascading Style Sheets Introduction to the PHP language, with particular emphasis on objectivity from version 5.x and the new possibilities of version 7.x HTTP protocol, Internet architecture MVC pattern, example in PHP, layered structure of web applications Template systems on the example of a selected PHP and JavaScript template Website security, including data security Supporting languages / technologies: XML, XSL, XPath, XSLT Document Object Model (DOM) JavaScript language, JSON format, jQuery library, templates (Handlebars / pug) Server-side JavaScript: Node.js environment, React vs AngularJS vs Angular library, Electron platform AJAX technology (including AJAX Push / Comet), providing indexing / positioning of pages Basic Apache configuration (.ht * files, mod_rewrite) Using frameworks, e.g. Django (Python language), Ruby on Rails (Ruby language), ASP.NET (.NET languages), Bootstrap Using ready-made CMS systems, eg Wordpress, creating your own themes Internet of Things (IoT) - intelligent buildings, RFID / NFC, communicating embedded systems based on microcontrollers</p> <p>PROJECT Students create a website that uses the technologies learned at the lecture. 1. Choosing a topic, a sketch of the layout of the pages of the website. 2. Creating a page layout (HTML + CSS). 3. Creating an administration panel in PHP. 4. JavaScript elements on the page. 5. XML handling elements. 6. Applications of AJAX technology. 7. Implementation of the website based on the selected framework.</p>											
Prerequisites and co-requisites												
Assessment methods and criteria	<table border="1"> <thead> <tr> <th data-bbox="456 893 794 920">Subject passing criteria</th> <th data-bbox="801 893 1139 920">Passing threshold</th> <th data-bbox="1145 893 1473 920">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="456 929 794 956">Lecture exam</td> <td data-bbox="801 929 1139 956">50.0%</td> <td data-bbox="1145 929 1473 956">30.0%</td> </tr> <tr> <td data-bbox="456 965 794 992">Project</td> <td data-bbox="801 965 1139 992">50.0%</td> <td data-bbox="1145 965 1473 992">70.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	Lecture exam	50.0%	30.0%	Project	50.0%	70.0%
Subject passing criteria	Passing threshold	Percentage of the final grade										
Lecture exam	50.0%	30.0%										
Project	50.0%	70.0%
