

Subject card

Subject name and code	Geodesy and cartography, PG_00049234						
Field of study	Spatial Development						
Date of commencement of studies	October 2020	Academic year of realisation of subject			2021/2022		
Education level	first-cycle studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			Polish		
Semester of study	4	ECTS credits			2.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of Geodesy -> Faculty of Civil and Environmental Engineering						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Anna Sobieraj-Żłobińska				
	Teachers		dr inż. Anna Sobieraj-Żłobińska				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	15.0	0.0	0.0	0.0	30
	E-learning hours included: 0.0 Adresy na platformie eNauczenie:						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM		
	Number of study hours	30	3.0	17.0	50		
Subject objectives	Familiarizing students with:- modern techniques and technologies in the field of acquiring, processing, collecting and sharing geodetic data for the design, implementation and operation of devices and structures- basic geodetic calculations.- basic measurement methods, geodetic instruments, cartographic systems, maps,- geodetic investment management- information related to the real estate cadastre.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K6_W03] has elementary knowledge in the field of mathematics and physics relating to issues related to space management, including the basic mathematical methods used in urban design, as well as analytical and design methods using information technology used in planning processes of settlement structures	The student knows the basic technologies and measurement methods used in geodesy, knows and understands the basic tasks and SI measures used in geodesy. The student has knowledge of geodetic and cartographic law with accompanying regulations.			[SW1] Assessment of factual knowledge [SW3] Assessment of knowledge contained in written work and projects		
	[K6_U03] acquires, collects and classifies information in the field of spatial management from a variety of sources, including literature, databases, electronic sources, field observations, surveys and interviews; can perform urban and ruralistic inventory	The student is able to obtain information from various databases and cartographic materials appropriate for the implementation of the selected task. He can read the necessary information from maps and other geodetic documents. The student is able to perform basic geodetic calculations. The student is able to prepare an engineering project in the field of geodesy.			[SU2] Assessment of ability to analyse information [SU5] Assessment of ability to present the results of task		

Subject contents	Definition of geodesy and its scope; division and tasks. Measurements in the SI system used in geodesy and their conversion. Types of reference surfaces and their definitions. The importance of the reference surface in the reduction of geodetic measurements and calculations. Geodetic control and its classification. Height and situational measurements. basic geodetic calculus, methods of calculating the area of land and the volume of earth masses based on geodetic measures Types of errors and their sources. Contemporary geodetic technologies (GNSS, scanning, remote sensing). State system of spatial references. Geodetic coordinate systems. Cartographic projections. Development of thematic maps. Real estate cadastre. Surveying in the investment process.														
Prerequisites and co-requisites	Basic knowledge of mathematics and physics														
Assessment methods and criteria	<table border="1" data-bbox="451 427 1487 566"> <thead> <tr> <th data-bbox="451 427 794 465">Subject passing criteria</th> <th data-bbox="794 427 1137 465">Passing threshold</th> <th data-bbox="1137 427 1487 465">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="451 465 794 504">project</td> <td data-bbox="794 465 1137 504">60.0%</td> <td data-bbox="1137 465 1487 504">35.0%</td> </tr> <tr> <td data-bbox="451 504 794 542">test</td> <td data-bbox="794 504 1137 542">60.0%</td> <td data-bbox="1137 504 1487 542">45.0%</td> </tr> <tr> <td data-bbox="451 542 794 566">report</td> <td data-bbox="794 542 1137 566">60.0%</td> <td data-bbox="1137 542 1487 566">20.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	project	60.0%	35.0%	test	60.0%	45.0%	report	60.0%	20.0%
