

关。GDAŃSK UNIVERSITY 创 OF TECHNOLOGY

Subject card

Subject name and code	Mathematics III, PG_00039390								
Field of study	Medical and Mechanical Engineering, Mechanical and Medical Engineering								
Date of commencement of studies	October 2020		Academic year of realisation of subject			2021/2022			
Education level	first-cycle studies		Subject group			Obligatory subject group in the field of study			
Mode of study	Full-time studies		Mode of delivery			at the university			
Year of study	2		Language of instruction			Polish			
Semester of study	3		ECTS credits			5.0			
Learning profile	general academic profile		Assessment form		exam				
Conducting unit	Mathematics Center -> Vice-Rector for Education								
Name and surname	Subject supervisor		dr inż. Magdalena Łapińska						
of lecturer (lecturers)	Teachers		dr inż. Magdalena Łapińska						
			mgr Katarzyna Kiepiela						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Projec	t	Seminar	SUM	
	Number of study hours	15.0	30.0	0.0	0.0		0.0	45	
	E-learning hours included: 0.0								
	Adresy na platformie eNauczanie: WIMiO - IMM sem.3 - Matematyka 3 2021/22 (M.Łapińska) - Moodle ID: 16403 https://enauczanie.pg.edu.pl/moodle/course/view.php?id=16403								
Learning activity and number of study hours		Participation in didactic classes included in study plan		Participation in consultation hours		Self-study		SUM	
	Number of study hours	45		10.0		70.0		125	
Subject objectives	The aim of this subject is to obtain the student's competence in the range of using the basic methods of mathematical analysis, ordinary differential equations, partial differential equations and probability theory. Furthermore, the student is able to use this knowledge to solve simple theoretical and practical problems that can be found in the field of engineering.								

Learning outcomes	Course outcome	Subject outcome	Method of verification				
	K6_W01	Student demonstrates some techniques for solving ordinary differential equations. Students finds the right method for solving the second - order differential equations. Student determines general and particular solutions of higher orders linear differential equations with constant coefficients. Student determines general and particular solutions of systems of differential linear equations. Student demonstrates some chosen techniques of solving ordinary differential equations using Laplace transform. Student determines general and particular solutions of a first-order partial linear differential equations.	[SW1] Assessment of factual knowledge				
	K6_U01	The student is able to solve the problem in the field of mechanical and medical engineering using the acquired knowledge, but also professional literature.	[SU3] Assessment of ability to use knowledge gained from the subject [SU2] Assessment of ability to analyse information				
	K6_U05	The student is able to use selected analytical and numerical methods of solving ordinary differential equations to solve engineering tasks in the field of mechanical and medical engineering.	[SU2] Assessment of ability to analyse information				
Subject contents	Triple integrals. First order ordinary linear equation. Second order linear differential equations with constant coefficients. Fundamental set of solution of the homogeneous linear differential equation. Non-homogeneous linear differential equations. Higher order linear differential equations with constant coefficients.Systems of differential equations. Laplace transform. Partial linear differential equations of first order. The Cauchy initial value problem. Partial differential equations of second order .Probability space, one-dimentional random variable continues and discrete, density function, distribution, expected value and variance of a random variable. Basic distribution of random variable.						
Prerequisites and co-requisites	Knowledge of the subject Mathemati	ics 1 and 2.					
Assessment methods	Subject passing criteria	Passing threshold	Percentage of the final grade				
and criteria	exam	50.0%	100.0%				
Recommended reading	Basic literature	Matwiejew M.M. Metody całkowania równań różniczkowych zwyczajnych PWN, Warszawa 1982, W. Krysicki, L. Włodarski Analiza matematyczna w zadaniach cz II PWN, Warszawa 1986, Jankowska K, Jankowski T, Zadania z matematyki wyższej PG Gdańsk 2007, Niedoba J, Niedoba W, Równania różniczkowe zwyczajne i cząstkowe pod redakcją B.Choczewskiego AGH 2001.Krysicki W,Bartos J, Dyczka W, Królikowska K, Wasilewski M. Rachunek prawdopodobieństwa i statystyka matematyczna w zadaniach PWN Warszawa 1989.

	eResources addresses	WIMiO - IMM sem.3 - Matematyka 3 2021/22 (M.Łapińska) - Moodle ID: 16403 https://enauczanie.pg.edu.pl/moodle/course/view.php?id=16403					

Example issues/ example questions/ tasks being completed	1.Find a general solution of differential equations.
	2. Find a particular solution satisfying the given initial conditions of the differential equations.
	3. Solve a system of differential equations.
Work placement	Not applicable
