

Subject card

Subject name and code	Material science III, PG_00039396								
Field of study	Medical and Mechanical Engineering, Mechanical and Medical Engineering								
Date of commencement of studies	October 2020		Academic year of realisation of subject			2021/2022			
Education level	first-cycle studies		Subject group			Obligatory subject group in the field of study			
						Subject group related to scientific research in the field of study			
Mode of study	Full-time studies		Mode of delivery			at the university			
Year of study	2		Language of instruction			Polish			
Semester of study	3		ECTS credits			1.0			
Learning profile	general academic profile		Assessment form			assessment			
Conducting unit	Department of Materials Engineering and Bonding -> Faculty of Mechanical Engineering and Ship Technology								
Name and surname	Subject supervisor		dr hab. inż. Marek Szkodo						
of lecturer (lecturers)	Teachers	dr inż. Marcin Wekwejt							
Lesson types and methods	Lesson type	Lecture	Tutorial	Laboratory	Projec	t	Seminar	SUM	
of instruction	Number of study hours	0.0	0.0	15.0	0.0		0.0	15	
	E-learning hours included: 0.0								
	Adresy na platformie eNauczanie: Materiałoznawstwo III IMM studia stacjonarne - Moodle ID: 18166 https://enauczanie.pg.edu.pl/moodle/course/view.php?id=18166								
Learning activity and number of study hours	Learning activity	Participation i classes including		Participation in consultation hours		Self-st	tudy	SUM	
Number of stud		15		3.0		7.0		25	
Subject objectives	The aim of the course is gaining the knowledge in the field of Materials Science, esp. about of constuction and functional materials.								
Learning outcomes	Course outcome		Subject outcome			Method of verification			
	K6_U07					[SU3] Assessment of ability to use knowledge gained from the subject			
	K6_W04					[SW3] Assessment of knowledge contained in written work and projects [SW1] Assessment of factual knowledge			
	K6_U09					[SU1] Assessment of task fulfilment			
Subject contents	Classification and general characteristics of materials. Structure of metal alloys. The iron-carbon balance system. Phase components of iron-carbon system. Iron-carbon alloys: steels, cast-steel and cast iron. Heat and chemical treatment of unalloyed steels.								
Prerequisites and co-requisites	Knowledge from the lecture regarding the subject, e.g. Materials Science / Fundamentals of Materials Science.								
Assessment methods and criteria	Subject passing criteria		Passing threshold			Percentage of the final grade			
						60.0%			
			50.0%			40.0%

Example issues/ example questions/	Draw the phase diagram of iron - cementite system. Select the proper temperature of annealing process for the given steel. Select the proper temperature of hardening process for the given steel.						
tasks being completed							
	4. What is the purpose of the carburizing process?						
	5. Characteristics of the main groups of steel.						
Work placement	Not applicable
