

## Subject card

Subject name and code	Fundamentals of Machine Design I, PG_00038858						
Field of study	Medical and Mechanical Engineering, Mechanical and Medical Engineering						
Date of commencement of studies	October 2020		Academic year of realisation of subject		2021/2022		
Education level	first-cycle studies		Subject group		Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	2		Language of instruction		Polish		
Semester of study	4		ECTS credits		4.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department of Machine Design and Vehicles -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Rafał Gawarkiewicz				
	Teachers		dr inż. Rafał Gawarkiewicz				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	15.0	15.0	0.0	0.0	45
	E-learning hours included: 0.0						
	Adresy na platformie eNauczanie: Podstawy konstrukcji maszyn I - L, IMM, I st., sem. V, zima 2021-22 (M:31639W0) - Moodle ID: 22604 <a href="https://enauczanie.pg.edu.pl/moodle/course/view.php?id=22604">https://enauczanie.pg.edu.pl/moodle/course/view.php?id=22604</a>						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	45		3.0		52.0	100
Subject objectives	Presenting principles of designing basic elements used in the mechanical systems. Acquainting with computational models of typical joints utilised in the machine designing.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	K6_W07	Student draws engineering drawings with the help of the CAD software.	[SW2] Assessment of knowledge contained in presentation
	K6_U07	Student identifies phenomena in elements of machines. Student analyses and selects suitable computational models of separable and inseparable joints.	[SU1] Assessment of task fulfilment
	K6_W09	Student draws engineering drawings with the help of the CAD software.	[SW2] Assessment of knowledge contained in presentation
	K6_U05	Student identifies phenomena in elements of machines. Student creates computational models used in machine design. Student analyses and selects suitable computational models of separable and inseparable joints. Student identifies loadings and stress states at critical places of analysed machine elements and estimates their safety.	[SU1] Assessment of task fulfilment
	K6_U08	Student identifies phenomena in elements of machines. Student creates computational models used in machine design. Student analyses and selects suitable computational models of separable and inseparable joints. Student identifies loadings and stress states at critical places of analysed machine elements and estimates their safety.	[SU1] Assessment of task fulfilment
Subject contents	Lecture and tutorials: elements of machine science and the theory of the design. Shaping machine elements using strength criteria - engineering methods. Safety coefficient and evaluation of permissible stress. Joints (welded, bolted) and hub-journal assembly. Laboratory: introduction to computer graphic. Familiarisation with CAD software in the range of creating 2D and 3D drawings.		
Prerequisites and co-requisites	Mathematics, Physics, Engineering graphics, Mechanics, Strength of materials, Materials science, Technology of the mechanical engineering, Metrology, Machine science		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	CAD laboratory	50.0%	10.0%
	Tests of the qualifying: classes and lecture	50.0%	90.0%
