Subject objectives	The aim of the course is to shape 3D imagination, learn the principles of projecting and defining working drawings in accordance with applicable standards and principles of Technical Drawing.		

Learning outcomes	Course outcome	Subject outcome	Method of verification
	K6_W03	A student draws space elements based on orthographic projection. He presents the rules of presentation elements in engineering drawing. He draws and reads structural forms of three-dimensional mechanical elements. He describes surface attributes of elements. He draws of machine elements dimensions and creates working drawings of machine elements according to machine technical drawing standards.	[SW1] Assessment of factual knowledge
	K6_U02	A student draws space elements based on orthographic projection. He presents the rules of presentation elements in engineering drawing. He draws and reads structural forms of three-dimensional mechanical elements. He describes surface attributes of elements. He draws of machine elements dimensions and creates working drawings of machine elements according to machine technical drawing standards.
