GDAŃSK UNIVERSITY OF TECHNOLOGY

Subject card

Subject name and code	Material Removal Processes, PG_00039869		
Field of study	Mechanical Engineering, Mechanical Engineering		
Date of commencement of studies	October 2020	Academic year of realisation of subject	2020/2021
Education level	first-cycle studies	Subject group	Obligatory subject group in the field of study Subject group related to scientific research in the field of study
Mode of study	Full-time studies	Mode of delivery	at the university
Year of study	1	Language of instruction	Polish
Semester of study	2	ECTS credits	4.0
Learning profile	general academic profile	Assessment form	exam
Conducting unit	Department of Manufacturing and Production Engineering -> Faculty of Mechanical Engineering and Ship Technology		
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. Wojciech Blacharski	
	Teachers	dr inż. Wojciech Blacharski dr hab. inż. Daniel Chuchała dr inż. Aleksandra Suchta	

Lesson types and methods of instruction

Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
Number of study hours	30.0	0.0	15.0	0.0	0.0	45

E-learning hours included: 0.0

Address on the e-learning platform: https://enauczanie.pg.edu.pl/moodle/course/view.php?id=10122
Adresy na platformie eNauczanie:
Obróbka Skrawaniem: W/L; MiBM 1 stopień, 2 semestr (M:31534W0): Lato 2021 - Moodle ID: 10122
https://enauczanie.pg.edu.pl/moodle/course/view.php?id=10122

Learning activity and number of study hours

Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM
Number of study hours	45	6.0	49.0	100

Subject objectives

Giving basic knowledge concerning manufacturing technologies with special consideration to cutting processes and machine tools.

Learning outcomes

Course outcome	Subject outcome	Method of verification
[K6_W08] possesses basic knowledge including the methodology of designing machine parts, mechanical devices, selection of construction materials, manufacturing and operation, with the lifetime cycle	The student describes the basic methods of machining, their technological possibilities and applications.	[SW1] Assessment of factual knowledge
[K6_W03] possesses and is able to practically apply the knowledge on the construction, properties and testing methods of construction materials	The student describes the properties of materials for cutting tool blades and the principles of their selection for machining tasks.	[SW1] Assessment of factual knowledge
[K6_U04] is able to perform a critical analysis of the existing technical solutions, present the specification of the technology of manufacturing basic construction elements of machines and engineering assemblies	Student characterizes physical phenomena during cutting processes and their influence on the course of machining.	[SU3] Assessment of ability to use knowledge gained from the subject

<table>
<tr><td>Subject contents</td><td>LECTURE Geometric and kinematic parameters of cutting. Movements of tools and workpieces during machining. Geometry of a cutting tool analysed in tool-in-hand system and in tool-in-use system. Geometry of cut. A phenomeon of chip formation and kinds of chips. Heat and temperature in cutting area. Coolant and lubricant agents. Wear of cutting tools. Quality of the surface after machining. Force and power during machining. Vibrations during cutting. Tool materials and rules of their selection. Basic ways of cutting: turning, milling, drilling, deepening, boring. Abrasive machining. Structure of abrasive tools: abrasive grains, bonds, principles of selecting grinding wheels. Wear processes and ways of dressing the grinding wheels. LABORATORY Parting-off materials and machine-tools for cutting-off. Machining on lathes. Machining on drilling machines. Machining on milling machines. Machining of toothed gear-wheels. Machining on grinding machines. Cutting on planning machines and vertical shapers.</td></tr>
<tr><td>Prerequisites and co-requisites</td><td>Basic knowledge of machinery and machine parts, materials and strength of materials.</td></tr>
<tr><td>Assessment methods and criteria</td><td><table>
<tr><th>Subject passing criteria</th><th>Passing threshold</th><th>Percentage of the final grade</th></tr>
<tr><td>Final test</td><td>50.0%</td><td>90.0%</td></tr>
<tr><td>Laboratory exercises</td><td>100.0%</td><td>10.0%</td></tr>
</table></td></tr>
<tr><td>Recommended reading</td><td><table>
