

Subject card

Subject name and code	Introduction to Higher Physics, PG_00040158						
Field of study	Mechanical Engineering, Mechanical Engineering						
Date of commencement of studies	October 2020		Academic year of realisation of subject		2020/2021		
Education level	first-cycle studies		Subject group		Obligatory subject group in the field of study		
Mode of study	Full-time studies		Mode of delivery		e-learning		
Year of study	1		Language of instruction		Polish		
Semester of study	1		ECTS credits		3.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department of Physics of Electronic Phenomena -> Faculty of Applied Physics and Mathematics						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Marcin Dampc				
	Teachers		dr inż. Marcin Dampc				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	30.0	0.0	0.0	0.0	30
	E-learning hours included: 30.0						
	Adresy na platformie eNauczanie:						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		6.0		39.0	75
Subject objectives	To review and improve understanding of physics from secondary school						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	K6_W02		has knowledge in classical physics		[SW1] Assessment of factual knowledge		
	K6_U01		can predict the effects of the laws of classical physics		[SU1] Assessment of task fulfilment		
Subject contents	Motion along a straight line. Velocity and acceleration. Free-fall acceleration. Graphical integration in motion analysis. Force. Mass. Newton's First Law. Newton's Second Law. Some particular forces. Newton's Third Law. Friction. Work and energy. Conservation of Energy. Linear momentum. The linear momentum of a system of particles. Conservation of Linear Momentum. Momentum and kinetic energy in collisions. Simple harmonic motion. Simple pendulum. Waves. Wavelength and frequency. The speed of traveling wave. Interference of waves. Electric charge. Coulomb's Law. Capacitors. Capacitors in parallel and in series. Electric current. Ohm's Law. Magnetic field. Force between two parallel conductors with current. Faraday's Law of Induction.						
Prerequisites and co-requisites	High school level physics knowledge						
Assessment methods and criteria	Subject passing criteria		Passing threshold		Percentage of the final grade		
	Midterm colloquium		50.0%		100.0%		
Recommended reading	Basic literature		1. K. Jezierski, K. Sierański, I. Szlufarska, "Repetytorium. Zadania z fizyki", Oficyna Wydawnicza Script, Wrocław 1997.				
			2. G. Jarosz, "Zadania na repetytorium" umieszczone na e-nauczaniu przy kursie Fizyka I				
	Supplementary literature		No requirements				
	eResources addresses						
Example issues/ example questions/ tasks being completed	Tree capacitors, C1=0,1 nF, C2=0,01 nF i C3=0,001 nF, were first connected in series and then in parallel. Which connection can store more charge?						

Work placement	Not applicable
