

Subject card

Subject name and code	Chemistry I, PG_00043528						
Field of study	Environmental Engineering						
Date of commencement of studies	October 2020		Academic year of realisation of subject		2020/2021		
Education level	first-cycle studies		Subject group		Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	1		Language of instruction		Polish		
Semester of study	2		ECTS credits		5.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department of Environmental Engineering Technology -> Faculty of Civil and Environmental Engineering						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Karolina Fitobór				
	Teachers		dr inż. Karolina Fitobór inż. Krystyna Mierzejewska dr inż. Alina Wargin

Subject objectives	Revision of the general chemistry and introduction to the chemistry of construction materials and environmental chemistry; knowledge and ability to perform chemical analyses (qualitative and quantitative tests of water and wastewater).						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[K6_U09] is able to use well-chosen methods and measuring devices that enable determination of basic parameters of the water treatment process and wastewater treatment; can perform simple laboratory tests leading to the assessment of water quality, pollutant load in sewage	Student is able to use properly selected methods and devices, and is able to perform simple laboratory tests.	[SU1] Assessment of task fulfilment [SU4] Assessment of ability to use methods and tools
	[K6_W03] has a structured and theoretically founded knowledge in the field of chemistry and biology, including knowledge necessary to understand the technological processes related to water treatment, wastewater treatment, waste management and sludge management	Student has in-depth and well-structured chemistry and biology knowledge, including the knowledge necessary to understand technological processes related to water and wastewater treatment, as well as waste and sludge management.	[SW1] Assessment of factual knowledge
Subject contents	Basic information of general chemistry (i.a.: constitution of matter, kinetics of chemical equations, stoichiometry, inorganic chemistry, physical chemistry), as well as the most important issues of chemistry of construction materials and environmental chemistry (with particular emphasis on water and wastewater chemistry).		
Prerequisites and co-requisites	Ability to use the knowledge from lectures during laboratory classes.		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Laboratory classes: course completion (tests, reports)	60.0%	40.0%
	Lectures: tests	60.0%	60.0%
