

## Subject card

| Subject name and code                       | Mathematical Statistics, PG_00044533   |   |   |                                     |        |   |                               |     |  |
|---|--|---|---|-------------------------------------|--------|---|-------------------------------|-----|--|
| Field of study                              | Transport  |   |   |                                     |        |   |                               |     |  |
| Date of commencement of studies             | October 2020   |   | Academic year of realisation of subject                               |                                     |        | 2020/2021   |                               |     |  |
| Education level                             | first-cycle studies  |   | Subject group   |                                     |        | Obligatory subject group in the field of study  |                               |     |  |
|   |  |   |   |                                     |        | Subject group related to scientific research in the field of study                              |                               |     |  |
| Mode of study                               | Full-time studies  |   | Mode of delivery  |                                     |        | at the university   |                               |     |  |
| Year of study                               | 1  |   | Language of instruction   |                                     |        | Polish  |                               |     |  |
| Semester of study                           | 2  |   | ECTS credits  |                                     |        | 3.0   |                               |     |  |
| Learning profile                            | general academic profile   |   | Assessment form   |                                     |        | exam  |                               |     |  |
| Conducting unit                             | Department of Railway Engineering -> Faculty of Civil and Environmental Engineering  |   |   |                                     |        |   |                               |     |  |
| Name and surname of lecturer (lecturers)    | Subject supervisor dr inż. Kamila Szwaczkiewicz  |   |   |                                     |        |   |                               |     |  |
|   | Teachers   |   | dr inż. Aleksandra Romanowska   |                                     |        |   |                               |     |  |
|   | dr inż. Kamila Szwaczkiewicz   |   |   |                                     |        |   |                               |     |  |
| Lesson types and methods                    | Lesson type  | Lecture                                     | Tutorial  | Laboratory                          | Projec | t   | Seminar                       | SUM |  |
| of instruction                              | Number of study hours  | 30.0  | 15.0  | 0.0                                 | 0.0    |   | 0.0                           | 45  |  |
|   | E-learning hours included: 0.0   |   |   |                                     |        |   |                               |     |  |
|   | Adresy na platformie eNauczanie:   |   |   |                                     |        |   |                               |     |  |
| Learning activity and number of study hours | Learning activity  | Participation in<br>classes include<br>plan |   | Participation in consultation hours |        | Self-study  |                               | SUM |  |
|   | Number of study hours  | 45  |   | 5.0                                 |        | 25.0  |                               | 75  |  |
| Subject objectives                          | The aim of the subject is to familiarize students with the methods of statistical data analysis such as estimation, hypothesis testing, Anova, regression and correlation.   |   |   |                                     |        |   |                               |     |  |
| Learning outcomes                           | Course outcome   |   | Subject outcome   |                                     |        | Method of verification  |                               |     |  |
|   | [K6_W01] has basic knowledge of mathematical analysis, algebra, calculus of probability and operational research required for describing and solving transport problems  |   | Performing statistical analysis of<br>the Data Mining type            |                                     |        | [SW1] Assessment of factual knowledge   |                               |     |  |
|   | [K6_U06] able to plan and conduct simple laboratory and operational experiments and simulations in the area of transport; able to interpret the results and formulate conclusions  |   | The use of a statistical apparatus to describe problems in transport. |                                     |        | [SU2] Assessment of ability to<br>analyse information<br>[SU1] Assessment of task<br>fulfilment |                               |     |  |
| Subject contents                            | Random measures. Random variables. Discrete and continuous (one- and multi-dimensional) distributions of random variables. Independence of random variables. Functions of random variables. Methods of mathematical statistics in estimation. Verification of statistical hypotheses, statistical tests. Regression and correlation. |   |   |                                     |        |   |                               |     |  |
| Prerequisites and co-requisites             | Knowledge of subjects: Mathematics   |   |   |                                     |        |   |                               |     |  |
| Assessment methods and criteria             | Subject passing criteria   |   | Passing threshold   |                                     |        | Per   | Percentage of the final grade |     |  |
|   | Test during the semester   |   | 50.0%   |                                     |        | 40.0%   |                               |     |  |
|   | Written exam   |   | 60.0%   |                                     |        | 60.0%   |                               |     |  |
