

Subject card

Subject name and code	Practice , PG_00044644							
Field of study	Transport							
Date of commencement of studies	October 2020	Academic year of realisation of subject			2022/2023			
Education level	first-cycle studies	Subject group			Optional subject group			
Mode of study	Full-time studies	Mode of delivery			at the university			
Year of study	3	Language of instruction			Polish			
Semester of study	6	ECTS credits			6.0			
Learning profile	general academic profile	Assessment form			assessment			
Conducting unit	Department of Railway Engineering -> Faculty of Civil and Environmental Engineering							
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. inż. Marek Pszczoła					
	Teachers							
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM	
	Number of study hours	0.0	0.0	0.0	0.0	0.0	0	
	E-learning hours included: 0.0							
Additional information: Internships take place in workplaces in the required time range, minimum 160 hours.								
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM	
	Number of study hours	0		0.0		150.0	150	
Subject objectives	1. familiar with the problems of maintenance of transport infrastructure (road, rail and maritime) 2. familiar with the problems of organization and management of road, air, rail and sea, 3. read the decision-making in the management of the transport company, 4. learning processes and practical methods of managing the flow of cargo volumes in modern logistics solutions in logistics companies, freight forwarding and courier 5. practical application of knowledge and skills acquired during their studies in practice.							
Learning outcomes	Course outcome		Subject outcome			Method of verification		
	[K6_K01] able to think and act creatively and enterprisingly; able to define priorities to support the delivery of an individual or group task; understands the need for continuous education and taking responsibility as a professional for their work and the work of the team		The student is able to adapt to the market requirements, can organize a workplace.					
	[K6_W07] has basic knowledge of setting up in business as individuals and companies		The student is able to act in an entrepreneurial manner.					
[K6_U10] able to carry out simple engineering tasks related to the construction and operation of a selected element of the transport system, select the right methods and tools, select the right technical parameters for an object to be designed including economic and environmental aspects		The student is able to solve the tasks assigned by the employer.						
Subject contents	organizational structure and management of the company transport or transport department, management of transport projects diagnostics and repair of transport infrastructure, organization and management of traffic, materials management and storage in the enterprise, analysis of the transport market,							

Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	report	100.0%	100.0%
Recommended reading	Basic literature	not applicable	
	Supplementary literature	not applicable	
	eResources addresses	Adresy na platformie eNauczenie:	
Example issues/ example questions/ tasks being completed	not applicable		
Work placement	Not applicable
