

Subject card

Subject name and code	Thesis Seminar , PG_00044646						
Field of study	Transport						
Date of commencement of studies	October 2020	Academic year of realisation of subject			2023/2024		
Education level	first-cycle studies	Subject group			Optional subject group		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	4	Language of instruction			Polish		
Semester of study	7	ECTS credits			5.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of Transportation Engineering -> Faculty of Civil and Environmental Engineering						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. Daniel Kaszubowski				
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	0.0	0.0	30.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study		SUM
	Number of study hours	30	15.0		80.0		125
Subject objectives	Practical introduction to a process of engineering thesis development Monitoring of the thesis progress						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K6_U01] able to use technical documentation and literature, databases and other sources of transport related information; able to interpret information, make logical links and formulate opinions and conclusions based on the above	student is capable to use appropriate documentation and databases			[SU2] Assessment of ability to analyse information		
	[K6_K01] able to think and act creatively and enterprisingly; able to define priorities to support the delivery of an individual or group task; understands the need for continuous education and taking responsibility as a professional for their work and the work of the team	student is prepared for development of engineering thesis of analytical character in the field of transportation systems			[SK2] Assessment of progress of work		
	[K6_U03] able to document a self-elaborated transport problem and present it in Polish and a foreign language, draft and read construction drawings	student is capable to solve a project task using available tools for modeling and analysis in the field of transportation system development and scenario analysis			[SU4] Assessment of ability to use methods and tools		
	[K6_U04] able to use transport terms properly and speak about a problem using modern audiovisual techniques	student is capable to present achieved results with modern visual technologies			[SU5] Assessment of ability to present the results of task		
Subject contents	1. Process of the diploma delivery 2. Editorial requirements 3. Using resources and databases 4. Verification of the thesis progress						
Prerequisites and co-requisites							

Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	quality and punctuality	60.0%	100.0%
Recommended reading	Basic literature	in accordance to the thesis content	
	Supplementary literature	n/d	
	eResources addresses	Adresy na platformie eNauczanie:	
Example issues/ example questions/ tasks being completed	n.d		
Work placement	Not applicable
