

## Subject card

Subject name and code	Mathematics I, PG_00050183						
Field of study	Engineering Management						
Date of commencement of studies	October 2020	Academic year of realisation of subject			2020/2021		
Education level	first-cycle studies	Subject group			Obligatory subject group in the field of study		
Mode of study	Part-time studies	Mode of delivery			blended-learning		
Year of study	1	Language of instruction			Polish		
Semester of study	1	ECTS credits			5.0		
Learning profile	general academic profile	Assessment form			exam		
Conducting unit	Mathematics Center -> Vice-Rector for Education						
Name and surname of lecturer (lecturers)	Subject supervisor		dr Stanisław Domachowski				
	Teachers		dr Stanisław Domachowski				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	16.0	16.0	0.0	0.0	0.0	32
	E-learning hours included: 16.0						
	Adresy na platformie eNauczanie: WZiE - Zarządzanie Inż. - MATEMATYKA I 2020/21 (S.Domachowski) - Moodle ID: 7075 <a href="https://enauczanie.pg.edu.pl/moodle/course/view.php?id=7075">https://enauczanie.pg.edu.pl/moodle/course/view.php?id=7075</a>						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study		SUM
	Number of study hours	32	7.0		86.0		125
Subject objectives	Students obtain competence in the range of using methods of mathematical analysis and linear algebra and knowledge how to solve simple problems that can be found in the field of engineering.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K6_W11] has the basic knowledge of mathematics, physics and chemistry necessary to solve technical problems	Student mentions basic properties of elementary functions. Student solves equations and inequalities with elementary functions. Student determines intervals of monotonicity of a given functions and its extrema. Students calculates antiderivatives using the substitution method of integration and integration by parts.			[SW1] Assessment of factual knowledge		
	[K6_U01] interprets and analyses the phenomena and processes taking place in the economy and organisation using basic theoretical knowledge of economics, management and science	Student analyses the properties of functions on the basis of an examination of its first and second derivatives. Student geometrically interprets the results of an examination of a graph of a function using the concept of limit, continuity and derivatives of functions.			[SU4] Assessment of ability to use methods and tools [SU3] Assessment of ability to use knowledge gained from the subject [SU2] Assessment of ability to analyse information		

Subject contents	<p>Functions of one variable and their properties: The absolute value function – definition, solving equations and inequalities with absolute value, graphs of functions with absolute value. Power functions – solving power and polynomial equations and inequalities. Rational functions – solving rational equations and inequalities. Exponential function – properties and graphs, solving exponential equations and inequalities. Logarithmic functions – properties and graphs, solving logarithmic equations and inequalities. Trigonometric and cyclometric functions – properties and graphs, solving trigonometric equations and inequalities. Limits and continuity: Infinite sequences. Fundamental definitions of limit of sequence, convergence and divergence, limit theorems. Applications to solving equations . Differential calculus of functions with one variable and applications of differential calculus of functions with one variable. Higher derivatives and differentials. Monotonicity and local extrema. Convexity, concavity and inflexion points of a function. De l'Hospital's Thorem. Asymptotes. Applying differential calculus to studying the properties of functions with one variable. Inegral calculus of functions with one variable – antiderivatives: The process of finding antiderivatives and integration formulas – the substitution method of integration and integration by parts.</p>														
Prerequisites and co-requisites															
Assessment methods and criteria	<table border="1"> <thead> <tr> <th data-bbox="448 456 794 490">Subject passing criteria</th> <th data-bbox="794 456 1141 490">Passing threshold</th> <th data-bbox="1141 456 1477 490">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="448 490 794 524">Written exam</td> <td data-bbox="794 490 1141 524">50.0%</td> <td data-bbox="1141 490 1477 524">50.0%</td> </tr> <tr> <td data-bbox="448 524 794 557">Active participation during classes</td> <td data-bbox="794 524 1141 557">0.0%</td> <td data-bbox="1141 524 1477 557">10.0%</td> </tr> <tr> <td data-bbox="448 557 794 591">Midterm colloquium</td> <td data-bbox="794 557 1141 591">50.0%</td> <td data-bbox="1141 557 1477 591">40.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	Written exam	50.0%	50.0%	Active participation during classes	0.0%	10.0%	Midterm colloquium	50.0%	40.0%
Subject passing criteria	Passing threshold	Percentage of the final grade													
Written exam	50.0%	50.0%													
Active participation during classes	0.0%	10.0%
