

Subject card

Subject name and code	Mechanics, PG_00038385						
Field of study	Electrical Engineering						
Date of commencement of studies	October 2020		Academic year of realisation of subject		2020/2021		
Education level	first-cycle studies		Subject group		Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Part-time studies		Mode of delivery		at the university		
Year of study	1		Language of instruction		Polish		
Semester of study	1		ECTS credits		3.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department of Mechatronics and High Voltage Engineering -> Faculty of Electrical and Control Engineering						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Łukasz Doliński				
	Teachers		dr inż. Łukasz Doliński				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	20.0	10.0	0.0	0.0	0.0	30
	E-learning hours included: 0.0						
	Adresy na platformie eNauczanie: Mechanika [Niestacjonarne][2020/21] - Moodle ID: 6320 https://enauczanie.pg.edu.pl/moodle/course/view.php?id=6320						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		3.0		42.0	75
Subject objectives	Obtaining of basic knowledge from mechanics and strength of materials						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	K6_U04		Student can solve simple problems of statics and strength of materials.		[SU4] Assessment of ability to use methods and tools		
	K6_W02		Student determines the equilibrium conditions of the basic force systems and defines the types of stresses.		[SW1] Assessment of factual knowledge		
Subject contents	Basic concepts. The axioms of statics. Original concepts: force as a vector, zero two, the theorem on moving the vector along the acting line, resultant of two non-parallel forces in the plane, decomposition of force to the two components of given directions. The principle of action and reaction, types of bonds, equilibrium of convergent set of forces, different sets of forces. Analytical representation of force. Main vector. Conditions of equilibrium of convergent flat and spatial set of forces. Three forces theorem. A pair of forces. Moment of pair of forces. Concatenation of two parallel forces. Pair of forces theorem. Concatenation of pair of forces in one plane. Moment of force with respect to the point and axis. Moment of a force with respect to the point (pole) and axis. Parallel moving forces theorem. Equilibrium of free, planar and spatial set of forces. Reduction of planar and spatial set of forces – typical cases. Condition of equilibrium of planar and spatial set of forces. Centre of gravity. Centre of parallel forces. Centre of gravity of solids, plane figures and lines. Friction, static friction, the force of static friction, kinetic friction, rolling friction. Basic assumptions and hypotheses of the strength of materials, types of loads, deformations and stresses. Elements of elasticity theory. Loads classification. The de Saint-Venant principle. Fundamentals of designing structures. Moments of inertia of planar figures. Tension and compression of straight bars. Technological Shear. Torsion of rods. Bending.						
Prerequisites and co-requisites	knowledge of algebra on secondary school level						
Assessment methods and criteria	Subject passing criteria		Passing threshold		Percentage of the final grade		
	theory test		50.0%		50.0%		
	task test		50.0%		50.0%
