

## Subject card

Subject name and code	Mathematics II, PG_00050294						
Field of study	Mechanical Engineering, Mechanical Engineering						
Date of commencement of studies	October 2020	Academic year of realisation of subject			2020/2021		
Education level	first-cycle studies	Subject group			Obligatory subject group in the field of study		
Mode of study	Part-time studies	Mode of delivery			at the university		
Year of study	1	Language of instruction			Polish		
Semester of study	2	ECTS credits			6.0		
Learning profile	general academic profile	Assessment form			exam		
Conducting unit	Mathematics Center -> Vice-Rector for Education						
Name and surname of lecturer (lecturers)	Subject supervisor		dr Anita Dąbrowicz-Tłałka				
	Teachers		dr Anita Dąbrowicz-Tłałka				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	30.0	0.0	0.0	0.0	60
	E-learning hours included: 0.0						
WM - MiBM niestacjonarne - Matematyka 2, 2020/2021 (A.Tłałka) - Moodle ID: 13014 <a href="https://enauczanie.pg.edu.pl/moodle/course/view.php?id=13014">https://enauczanie.pg.edu.pl/moodle/course/view.php?id=13014</a>							
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	60		9.0		81.0	150
Subject objectives	The aim of this subject is to obtain the students competence in the range of using the basic methods of mathematical analysis and linear algebra. Furthermore, the student is able to use this knowledge to solve simple theoretical and practical problems that can be found in the field of engineering.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_W01] possesses mathematical knowledge within the range of linear algebra and mathematical analysis useful in characterising and interpreting mechanical systems, technological processes and operational properties of devices		Student recognizes the importance of skillful use of basic mathematical apparatus in terms of study in the future.		[SW1] Assessment of factual knowledge [SW3] Assessment of knowledge contained in written work and projects		
	[K6_U01] is able to acquire information from specialized literary sources, databases and other resources, essential for solving engineering tasks; is able to compile the obtained information pieces and to interpret them, additionally is able to form conclusions and present justified opinion		Student is able to process the acquired information, analyze and interpret it, draw conclusions and reason opinions.		[SU3] Assessment of ability to use knowledge gained from the subject [SU2] Assessment of ability to analyse information		

Subject contents	<p>Antiderivative (primitive).</p> <p>The process of finding antiderivatives and integration formulas the substitution method of integration and integration by parts.</p> <p>Integration of rational, trigonometric and irrational functions.</p> <p>Newton-Leibniz Thorem.</p> <p>Integration formulas, the substitution method of integration and integration by parts for definite integrals.</p> <p>Improper integrals.</p> <p>Applications of integral calculus in computing areas of plane figures, lengths of arcs, volumes of solids of revolution.</p> <p>Functions of two variables. Partial derivatives. Differential of function. Extrema of function.</p> <p>Double integrals and their applications. Areas of flat regions. Volume of solids. Area of a piece of surface.</p>											
Prerequisites and co-requisites	<p>Knowledge of differential calculus of one variable functions.</p> <p>Knowledge of matrix calculus.</p>											
Assessment methods and criteria	<table border="1"> <thead> <tr> <th data-bbox="456 1005 794 1034">Subject passing criteria</th> <th data-bbox="799 1005 1137 1034">Passing threshold</th> <th data-bbox="1142 1005 1469 1034">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="456 1041 794 1070">written exam</td> <td data-bbox="799 1041 1137 1070">50.0%</td> <td data-bbox="1142 1041 1469 1070">50.0%</td> </tr> <tr> <td data-bbox="456 1077 794 1106">midterm colloquium</td> <td data-bbox="799 1077 1137 1106">50.0%</td> <td data-bbox="1142 1077 1469 1106">50.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	written exam	50.0%	50.0%	midterm colloquium	50.0%	50.0%
Subject passing criteria	Passing threshold	Percentage of the final grade										
written exam	50.0%	50.0%										
midterm colloquium	50.0%	50.0%

	eResources addresses											

Example issues/ example questions/ tasks being completed	1) Using the definite integral, determine the area of the area between the graphs of the curves ...  2) Find local extremes of functions of two variables ...  3) Use the double integral to calculate the volume of a solid bounded by areas ....
Work placement	Not applicable
