

Subject card

Subject name and code	Material behaviour during joining , PG_00050174						
Field of study	Mechanical Engineering, Mechanical Engineering						
Date of commencement of studies	October 2020		Academic year of realisation of subject		2022/2023		
Education level	first-cycle studies		Subject group		Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Part-time studies		Mode of delivery		at the university		
Year of study	3		Language of instruction		Polish		
Semester of study	6		ECTS credits		4.0		
Learning profile	general academic profile		Assessment form		exam		
Conducting unit	Department of Materials Engineering and Bonding -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. inż. Dariusz Fydrych				
	Teachers		dr hab. inż. Dariusz Fydrych				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	15.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		8.0		62.0	100
Subject objectives	Obtaining of knowledge of weldability of stel and nonferrous metals						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_U10] is able to formulate the principles of selecting a material for a construction, ensuring the correct operation of a device		Student can recognize the constructional materials and their operating properties.		[SU3] Assessment of ability to use knowledge gained from the subject [SU2] Assessment of ability to analyse information		
	[K6_W03] possesses and is able to practically apply the knowledge on the construction, properties and testing methods of construction materials		Student can choose the method of joining (fusion welding, resistance welding, soldering) for a group of materials and he can develop the technical procedure specification.		[SW1] Assessment of factual knowledge		
Subject contents	LECTURE						
	Weldability. The phenomena of cracking during the welding process. Hot, cold, lamellar and reheat cracks. Weldability of alloy steels. Characteristics of consumables. Thermal field, thermal cycle. Crystallization of the weld metal. Metallurgical reactions and slag properties. Design of the weld metal. Heat affected zone. CTP and CTPcs charts. The concept of t8/5. Weldability of ferrous and nonferrous alloys.						
	LABORATORY						
	Determination of susceptibility of steel to hot and cold cracking. Evaluation of weldability of mild and high alloyed steels. Determination of diffusible hydrogen content in deposited metal.						
Prerequisites and co-requisites							

Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Passed laboratories	60.0%	40.0%
	Written test	60.0%	60.0%
Recommended reading	Basic literature	1. Tasak E.: Spawalność stali. Wyd. Fotobit, Kraków, 2002. 2. Praca zbiorowa: Poradnik Inżyniera - Spawalnictwo. WNT, Warszawa, 2003. 3. Tasak E.: Metalurgia spawania. Wyd. Jak, Kraków, 2008.	
	Supplementary literature	1. Jakubiec M., Lesiński K., Czajkowski H.: Technologia konstrukcji spawanych. WNT Warszawa 1987. 2. Pilarczyk J., Pilarczyk J.: Spawanie i napawanie elektryczne metali. Wydawnictwo Śląsk Katowice 1996.	
	eResources addresses	Adresy na platformie eNauczanie: Zachowanie materiałów w czasie spajania, Mechanika i budowa maszyn, I stopnia – inżynierskie, sem. 6, 2022/2023 - Moodle ID: 29494 https://enauczanie.pg.edu.pl/moodle/course/view.php?id=29494	
Example issues/ example questions/ tasks being completed	Describe weldability of heat resistant steel. Describe weldability of stainless steel. Describe weldability of aluminium alloys.		
Work placement	Not applicable
