

Subject card

Subject name and code	Project, PG_00041774									
Field of study	Ocean Engineering, Ocean Engineering									
Date of commencement of	October 2020	T			0004/0000					
studies	October 2020		Academic year of realisation of subject			2021/2022				
Education level	first-cycle studies		Subject group			Optional subject group Subject group related to scientific research in the field of study				
Mode of study	Full-time studies		Mode of delivery			at the university				
Year of study	2		Language of instruction			Polish				
Semester of study	3		ECTS credits			3.0				
Learning profile	general academic profile		Assessment form			assessment				
Conducting unit	Department of Theory and Ship Design -> Faculty of Mechanical Engineering and Ship Technol					ology				
Name and surname	Subject supervisor									
of lecturer (lecturers)	Teachers		dr inż. Cezary Żrodowski							
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Projec	:t	Seminar	SUM		
	Number of study hours	0.0	0.0	0.0	30.0		0.0	30		
	E-learning hours included: 0.0									
	Adresy na platformie eNauczanie: Praca projektowa 1 - 2021 - Moodle ID: 20441 https://enauczanie.pg.edu.pl/moodle/course/view.php?id=20441									
Learning activity and number of study hours	Learning activity	ng activity Participation in classes including plan				Self-st	udy	SUM		
	Number of study hours	30		5.0		40.0		75		
Subject objectives	Introduction to ship design theory, presentation of ship design process, basic tools and professional vocabulary.									
Learning outcomes	Course out	Course outcome Subject outcome Method of verific					rification			
	[K6_W06] has an organized knowledge on engineering methods and design tools allowing the conducting of projects within the construction and operation of ocean technology objects and systems		The student independently formulates conclusions regarding the designed ship and explains their origin.			[SW3] Assessment of knowledge contained in written work and projects				
	range of design, construction and operation of ocean technology objects and systems		The student performs a simplified conceptual design of the multipurpose dry cargo ship, including: a) parametric model b) hull shape (lines) c) compartments d) freeboard e) tonnage f) estimation of stability g) a simplified general arrangement			[SU1] Assessment of task fulfilment				
	[K6_W05] has an organized knowledge on design, construction and operation of ocean technology objects and systems		The student can prepare a technical report in accordance with the formal and technical requirements, including a simplified initial design of the ship			[SW3] Assessment of knowledge contained in written work and projects				
Subject contents	Rules for design calculations: measurement units, mathematical models, presentation and explanation of calculation results. Physical phenomena, theoretical and empirical design relationships. Functional and safety criteria. Buoyancy equation. Calculation of main design parameters on example of multipurpose dry cargo ship. Compartmentation. Calculation of buoyancy, stability and register tonnage.
