

GDAŃSK UNIVERSITY

Subject card

Subject name and code	Exploitation of Renewable Energy Souces, PG_00042187								
Field of study	Power Engineering, Power Engineering, Power Engineering, Power Engineering, Power Engineering								
Date of commencement of studies	October 2020		Academic year of realisation of subject			2022/2023			
Education level	first-cycle studies		Subject group			Optional subject group Subject group related to scientific research in the field of study			
Mode of study	Full-time studies		Mode of delivery			at the university			
Year of study	3		Language of instruction			Polish			
Semester of study	6		ECTS credits			1.0			
Learning profile	general academic profile		Assessment form			assessment			
Conducting unit	Department of Electr	Department of Electrical Power Engineering -> Faculty of Electrical and Control Engineer				Engineering			
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Izabela Prażuch						
	Teachers		dr inż. Izabela Prażuch						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Projec	Project Seminar		SUM	
	Number of study hours	15.0	0.0	0.0	0.0		0.0	15	
	E-learning hours included: 0.0								
Learning activity and number of study hours	Learning activity	Participation i classes includ plan		Participation in consultation hours		Self-study		SUM	
	Number of study hours	15		2.0		8.0		25	
	To teach students how to calculate technical parameters of renewable energy sources								
Learning outcomes	Course outcome		Subject outcome			Method of verification			
	K6_W10		The student knows the basic issues related to the operation of energy devices in systems using renewable energy resources			[SW1] Assessment of factual knowledge			
	K6_U05		The student explains and develops the methods of converting renewable energy into electricity and heat in a useful form. The student learns general information about energy consumption.			[SU2] Assessment of ability to analyse information [SU3] Assessment of ability to use knowledge gained from the subject			
Subject contents Prerequisites and co-requisites	Presentation of the overall situation of the national energy sector. Presentation of the shares and development trends in the domestic use of renewable energy. Discussion of the laws affecting the development and use of renewable energy sources cogeneration high economy. Presentation of the national potential of solar energy. Discussion of the types of solar collectors. A discussion of the different mounting methods. The use of solar collectors for hot water. Collectors cooperation systems with other sources. The possibility of using solar energy for heating purposes. Operational problems with solar collectors. The economics of solar collectors solutions. Types of photovoltaic cells (PV). Ways to use electricity from PV cells. Methods for assembly and construction of PV plants. The economics of small and large PV plants. Wind energy potential in the Polish market. The innfluence of terrain on wind energy potential. The types of power plants and wind turbines. The economics of a small wind turbine construction. The economics of the economics of the beat exchanger for heating system with heat pump. Conditions for the effective heat pump operation. Cascade heat pump systems. Sources of biogas. The composition and quality of biogas. Ways to use. The economics of biogas production. Sources of biomass. Plant energy crops. Performance of energy crops. Biomass combustion plants. Biofuels in transport sector: types biofuels and methods of preparation.								

Assessment methods	Subject passing criteria	Passing threshold	Percentage of the final grade		
and criteria	test	60.0%	100.0%		
Recommended reading	Basic literature	 Witold M. Lewandowski, Proekologiczne odnawialne źródła energii. Wydawnictwo Naukowo-Techniczne, 2010. Bogdan Szymański, Instalacje fotowoltaiczne. GlobEnergia 2020. 			
	Supplementary literature	 Ewa Klugman-Radziszewska, Fotowoltaika w teorii i praktyce. BTC, 2010. Articles and websites devoted to renewable energy sources 			
	eResources addresses	Adresy na platformie eNauczanie:			
Example issues/ example questions/ tasks being completed	Selection of PV installations Design, construction and exploitation problems of renewable energy sources				
Work placement	Not applicable
