

Subject card

Subject name and code	Energy Use Rationalization, PG_00042075						
Field of study	Power Engineering, Power Engineering, Power Engineering, Power Engineering, Power Engineering						
Date of commencement of studies	October 2020		Academic year of realisation of subject		2022/2023		
Education level	first-cycle studies		Subject group		Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	3		Language of instruction		English		
Semester of study	5		ECTS credits		2.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department of Electrical Power Engineering -> Faculty of Electrical and Control Engineering						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Marcin Jaskólski				
	Teachers		dr inż. Marcin Jaskólski				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	0.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		5.0		15.0	50
Subject objectives	Acquisition of technical and economic calculations skills for energy technologies and energy saving projects.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	K6_W10		Development of technical-economic analysis of selected technology, using renewable energy source, fossil fuels or nuclear energy.		[SW1] Assessment of factual knowledge [SW3] Assessment of knowledge contained in written work and projects		
	K6_W06		Development of technical-economic analysis of selected technology, using renewable energy source, fossil fuels or nuclear energy.		[SW1] Assessment of factual knowledge [SW3] Assessment of knowledge contained in written work and projects		
Subject contents	Energy policy of the European Union and Poland. Legal documents and support programs for energy efficiency. Measures to improve energy efficiency. Energy audit. Certificate of energy performance of the building. Heat for the needs of buildings. Thermomodernization. Electric drives. Cogeneration. Indicators of energy efficiency assessment. Cost analysis and static and dynamic methods of assessing cost-effectiveness in energy. Technical and economic analysis of the selected technologies using renewable energy resources, fossil fuels or nuclear energy.						
Prerequisites and co-requisites							
Assessment methods and criteria	Subject passing criteria		Passing threshold		Percentage of the final grade		
	Analytical study and its presentation		60.0%		100.0%		

Recommended reading	Basic literature	European Standard Energy Audits (EN 16247-1) Thumann A., Dunning S., Plant Engineers and Managers Guide to Energy Conservation, CRC Press, 2011
	Supplementary literature	OECD IEA/NEA, Projected costs of generating electricity, 2015 Edition, Paris, 2015 D. Kirschen, G. Strbac, Fundamentals of power system economics, John Wiley & Sons, Ltd, Chichester, 2004. doi:10.1002/0470020598. M. Jaskólski, Modelling long-term technological transition of Polish power system using MARKAL: Emission trade impact, Energy Policy. 97 (2016) 365–377. doi:10.1016/j.enpol.2016.07.017. M. Jaskólski, A. Reński, T. Minkiewicz, Thermodynamic and economic analysis of nuclear power unit operating in partial cogeneration mode to produce electricity and district heat, Energy. (2017). doi:10.1016/j.energy.2017.04.144.
	eResources addresses	Adresy na platformie eNauczanie: Energy Use Rationalization [22/23] - Moodle ID: 25951 https://enauzanie.pg.edu.pl/moodle/course/view.php?id=25951
Example issues/ example questions/ tasks being completed	1. Calculation of electricity production in selected technology. 2. Calculation of primary or secondary energy consumption by manufacturing technology. 3. Calculating the environmental effects of energy production and use. 4. Calculation of cost and profitability indicators for selected energy technology.	
Work placement	Not applicable
