

Subject card

Subject name and code	Mathematics 1, PG_00041990						
Field of study	Power Engineering, Power Engineering, Power Engineering, Power Engineering, Power Engineering						
Date of commencement of studies	October 2020	Academic year of realisation of subject			2020/2021		
Education level	first-cycle studies	Subject group			Obligatory subject group in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	1	Language of instruction			English		
Semester of study	1	ECTS credits			6.0		
Learning profile	general academic profile	Assessment form			exam		
Conducting unit	Mathematics Center -> Vice-Rector for Education						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Magdalena Łapińska				
	Teachers		dr inż. Magdalena Łapińska				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	60.0	0.0	0.0	0.0	90
	E-learning hours included: 0.0						
	Adresy na platformie eNauczanie: Energy Technologies - sem 1 - Mathematics 1 2020/21 (M.Łapińska) - Moodle ID: 5834 https://enauczanie.pg.edu.pl/moodle/course/view.php?id=5834						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	90		15.0		45.0	150
Subject objectives	Students obtain competence in using methods of mathematical analysis (single variable calculus) and linear algebra, and knowledge how to solve simple problems that are found in the field of engineering.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	K6_U02	Student uses various methods to solve systems of linear equations. Student analyzes and solves problems from the area of analytic geometry. Student applies the basic properties of derivatives. Student analyzes the properties of functions with the use of its first and second derivatives. Student applies basic formulas and techniques of integration to calculate indefinite integrals. Student uses basic operations on complex numbers. Student solves the ordinary differential equations of the first and second order.			[SU3] Assessment of ability to use knowledge gained from the subject		
	K6_W01	Assessment of ability to use knowledge gained in the different modules.			[SW1] Assessment of factual knowledge		

Subject contents	<p><u>Elements of linear algebra.</u></p> <ul style="list-style-type: none"> • Matrices and matrix operations. • Determinants and their properties. • Inverse matrix. • Rank of a matrix. Systems of linear equations. <p><u>Analytic geometry in 3-space.</u></p> <ul style="list-style-type: none"> • The vectors, dot product, cross product and triple scalar product and their applications. • Equations of lines and planes <p><u>Elementary functions.</u></p> <ul style="list-style-type: none"> • Linear function • Quadratic function • Polynomials • Power function • Exponential function • Logarithmic function • Cyclometric and trigonometric functions <p><u>Sequences.</u></p> <ul style="list-style-type: none"> • Definition. • Monotone sequences. • Limit of a sequence. <p><u>Differential calculus of one variable functions.</u></p> <ul style="list-style-type: none"> • Applications differential calculus of one variable functions. <p><u>Anti-derivate.</u></p> <ul style="list-style-type: none"> • The substitution method of integration and integration by parts. • Integration of rational, trigonometric and irrational functions. <p><u>Definite integrals</u></p> <ul style="list-style-type: none"> • Application <p><u>Improper integrals.</u></p>											
Prerequisites and co-requisites
