

## Subject card

Subject name and code	Environmental Protection in Energetics, PG_00049751						
Field of study	Power Engineering, Power Engineering, Power Engineering, Power Engineering, Power Engineering						
Date of commencement of studies	October 2020		Academic year of realisation of subject		2020/2021		
Education level	first-cycle studies		Subject group		Obligatory subject group in the field of study		
Mode of study	Full-time studies		Mode of delivery		blended-learning		
Year of study	1		Language of instruction		English		
Semester of study	1		ECTS credits		3.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department of Ship and Land Based Power Plants -> Faculty of Ocean Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor		mgr inż. Irena Dziwisz-Olszak				
	Teachers		dr inż. Blanka Jakubowska				
			mgr inż. Roksana Michałka				
			mgr inż. Aleksandra Gołąbek				
			dr inż. Bartosz Dawidowicz				
			mgr inż. Mariusz Furmanek				
			mgr inż. Irena Dziwisz-Olszak				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	15.0	0.0	0.0	30
	E-learning hours included: 11.0						
	Adresy na platformie eNauczanie:						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		3.0		42.0	75
Subject objectives	To acquaint students with the environmental aspects of energy production and processing.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	K6_K03		Student lists pollutants emitted into the atmosphere. Student defines and distinguishes between waste and hazardous waste. Student lists basic legislation on environmental protection.		[SK5] Assessment of ability to solve problems that arise in practice		
	K6_W10		The student lists renewable energy sources. Student explains the ecological aspects of the use of renewable energy sources.		[SW2] Assessment of knowledge contained in presentation		
	K6_W06		Student explains the environmental aspects of the use of different energy sources. Student describes methods for reducing the emission of pollutants into the atmosphere. Student describes the water and wastewater circulation in a power station		[SW1] Assessment of factual knowledge		
Subject contents	The principle of sustainable development. Non-renewable and renewable energy sources. Environmental aspects of the use of different energy sources. Atmospheric pollution. Methods of reducing the emission of pollutants into the atmosphere. Waste and hazardous waste. Water and Wastewater. Legal aspects of environmental protection.						

Prerequisites and co-requisites	No requirements		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Written test	50.0%	50.0%
	Reports from the laboratory exercises	100.0%	50.0%
Recommended reading	Basic literature	1. A. Farmer. Handbook of Environmental Protection and Enforcement. Principles and Practice. Earthscan. London. 2007 2. D.H.F. Liu, B.G. Liptak, P.A. Bouis. Environmental Engineers Handbook. Lewis Publishers. 1997. 3. F.R. Spellman. Handbook of Environmental Engineering. CRC Press. 2015.

	eResources addresses		
Example issues/ example questions/ tasks being completed	1. What is the principle of sustainable development? 2. List the most important pollutants emitted into the atmosphere by burning fossil fuels. 3. Give some examples of techniques used in the clean-burning boilers. 4. What is a trading system for CO2 emissions		
Work placement	Not applicable
