

Subject card

Subject name and code	Group Work, PG_00042027						
Field of study	Power Engineering, Power Engineering, Power Engineering, Power Engineering, Power Engineering						
Date of commencement of studies	October 2020		Academic year of realisation of subject		2020/2021		
Education level	first-cycle studies		Subject group		Obligatory subject group in the field of study Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	1		Language of instruction		English		
Semester of study	2		ECTS credits		2.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department of Energy and Industrial Apparatus -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Maciej Wierzbowski				
	Teachers		dr inż. Maciej Wierzbowski				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	0.0	30.0	0.0	30
	E-learning hours included: 0.0						
	Adresy na platformie eNauczanie: Group Work - P - Energy Technologies, sem.2 (PG_00042027) - Moodle ID: 13160 https://enauczenie.pg.edu.pl/moodle/course/view.php?id=13160						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		5.0		15.0	50
Subject objectives	The students gain experience in forming groups, selecting leaders, making suggestions, creating ideas, negotiation, discussion, taking responsibility, solving conflicts, making decisions, maintainig atmosphere and learning to cooperate in groups.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	K6_K01		The student is able to organize further education and self-improvement in the field of energy industry and is able to find opportunities for further education		[SK5] Assessment of ability to solve problems that arise in practice [SK3] Assessment of ability to organize work		
	K6_U01		The student can acquire information from literature and other sources, organize, interpret and draw conclusions and formulate conclusions; has the ability to self-education, the results of engineering tasks performed, speaks English		[SU5] Assessment of ability to present the results of task [SU2] Assessment of ability to analyse information [SU1] Assessment of task fulfilment		
	K6_K03		The student knows about the risks to health and life when using power equipment, is aware of the impact of engineering activities on the environment		[SK4] Assessment of communication skills, including language correctness [SK3] Assessment of ability to organize work [SK1] Assessment of group work skills		
	K6_K02		The student is able to work in a group taking on different roles, is able to think and act in an entrepreneurial way, is aware of the responsibility for his own work and take responsibility for teamwork		[SK1] Assessment of group work skills [SK4] Assessment of communication skills, including language correctness [SK3] Assessment of ability to organize work		

Subject contents	Forming groups, clarifying goals and particular tasks, role of leader, types of group leaders, leadership systems, participation of individuals, allocation of responsibility, effective group characteristics, generating ideas (brain storm), encouraging ideas, encouraging individuals activity and motivation, conflicts in groups, principles of discussion, principles of negotiations, methods of manipulation, preparing presentations, organisation of meetings, problems of risk and making decisions, giving, questioning, seeking information and opinions, group atmosphere. Designing and building of technical models according to teacher's instructions.		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Attending classes	80.0%	30.0%
	Activity during classes	70.0%	70.0%
Recommended reading	Basic literature	Teaching materials will be selected by the teacher and the students will be informed about them at the beginning of the semester (according to the designed model).	
	Supplementary literature	Teaching materials will be selected by the teacher and the students will be informed about them at the beginning of the semester (according to the designed model).	
	eResources addresses	Group Work - P - Energy Technologies, sem.2 (PG_00042027) - Moodle ID: 13160 https://enauczenie.pg.edu.pl/moodle/course/view.php?id=13160	
Example issues/ example questions/ tasks being completed			
Work placement	Not applicable
