

## § GDAŃSK UNIVERSITY § OF TECHNOLOGY

## Subject card

Subject name and code	Manufacturing Techniques 1, PG_00042029									
Field of study	Power Engineering, Power Engineering, Power Engineering, Power Engineering, Power Engineering									
Date of commencement of studies	October 2020		Academic year of realisation of subject			2020/2021				
Education level	first-cycle studies		Subject group			Obligatory subject group in the field of study				
Mode of study	Full-time studies		Mode of delivery			at the	university			
Year of study	1		Language of instruction			Englis	English			
Semester of study	2		ECTS credits			3.0				
Learning profile	general academic profile		Assessment form			assessment				
Conducting unit	Institute of Manufacturing and Materials Technology -> Faculty of Mechanical Engineering and Ship Technology									
Name and surname	Subject supervisor		dr hab. inż. Stefan Dzionk							
of lecturer (lecturers)	Teachers		dr hab. inż. Sł	dr hab. inż. Stefan Dzionk						
			dr inż. Piotr Sender							
Lesson types and methods	Lesson type	Lecture	Tutorial	Laboratory	Projec	t	Seminar	SUM		
of instruction	Number of study hours	15.0	0.0	15.0	0.0		0.0	30		
	E-learning hours inclu	E-learning hours included: 0.0								
	Address on the e-learning platform: https://enauczanie.pg.edu.pl/moodle/course/view.php?id=10368 Adresy na platformie eNauczanie:									
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study		SUM		
	Number of study hours	30		5.0		40.0		75		
Subject objectives	Presentation basic metods of the manufacturing systems, including: the mechanics of the cutting phenomena, cutting parameters, types of materials for cutting edge, design and use of tools and machine tools for turning, drilling, milling and grinding.									
Learning outcomes	Course out	come	Subject outcome				Method of verif	fication		
	K6_K02		The student is aware of the responsibility for his own work in the aspect of the safety of the implementation of various manufacturing techniques.			[SK1] Assessment of group work skills				
	K6_W06		The student selects machining methods and machine tools for shaping the basic types of flat and cylindrical surfaces. The student selects tools and machining parameters.			[SW1] Assessment of factual knowledge				

Subject contents	LECTURE Basic concepts of machining. Classification of machining. Elements of the workpiece and tools. Kinematics of machining. General design of machines. Basics of the material removal processes. Physical basics of the cutting process. The geometry of the removed layer. Forces, torques and power of cutting. Geometrical and technological parameters of machining. Heat and cutting temperature. Cooling and greasing substances. Design of cutting tools. Geometry of the cutting edges in cutting tools. Modern tools materials. Consumption and durability of cutting tools. Machinability of materials. Selection principles for tools and cutting parameters. Turning. Purpose and variety of rolling. Construction and kinematics of a universal lathe. Conventional turning. Mounting tools and machined objects on the lathe. Basic lathe operations. Milling. Purpose and variety of milling. Millings conditions. Construction of vertical and horizontal milling. Millings equipment. Examples of work carried out by milling. Boring. Construction and kinematics of drills. Construction and purpose of tools for drilling, reaming and countersinking. Grinding. Materials used for abrasive tools. Characteristics of abrasive tools used for the processing of flat surfaces, shafts and holes. Examples of grinding operations. LABORATORY EXERCISES: 1. Lathe manufacturing system: machine tools, tools and their selection, process parameters and machining possibilities. 2. Milling manufacturing system: machine tools, tools and their selection, parameters of the process and machining possibilities, construction, operation of the dividing head. 3. Work shop metrology, tools and mesurement methods. 4. Finishing: machining methods, machine tools, tools and their selection, process parameters and machining possibilities. 5. Basics of computer aided in preparation of turning processes. 6. Basics of computer aided in preparation of milling process					
	technology. 7. Gear machining: technologies, parameters, use of dividers head.					
Prerequisites and co-requisites	Basics of technical drawings					
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade			
	Assessment of laboratory	60.0%	50.0%			
	Final test	60.0%	50.0%			
Recommended reading	Basic literature	<ol> <li>Kalpakjian S., Schmid S.: Manufacturing Engineering and Technology. Prentice Hall; 7 edition (April 11, 2013).</li> <li>Cichosz P.: Narzędzia skrawające. WNT, Warszawa 2006.</li> <li>Olszak W.: Obróbka skrawaniem. WNT, Warszawa 2008.</li> </ol>				
	Supplementary literature	Thematic articles from databases of the GUT Library				
	eResources addresses					
Example issues/ example questions/ tasks being completed	<ol> <li>Built-up edge in the cutting zone.</li> <li>Cemented carbide as a tool material .</li> <li>Design of a universal lathe.</li> <li>Technology of precise hole H7.</li> </ol>					
Work placement	Not applicable
