

Subject card

Subject name and code	Automation, PG_00041671						
Field of study	Transport and Logistics, Transport and Logistics						
Date of commencement of studies	October 2020	Academic year of realisation of subject			2021/2022		
Education level	first-cycle studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			Polish		
Semester of study	4	ECTS credits			4.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Institute of Ocean Engineering and Ship Technology -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor	dr hab. inż. Marek Dzida					
	Teachers	mgr inż. Anna Butterweck dr hab. inż. Marek Dzida					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	15.0	0.0	0.0	0.0	45
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study	SUM	
	Number of study hours	45	10.0		45.0	100	
Subject objectives	The objective is to learn the fundamentals of control theory and the structures and elements of basic automation systems, as well as general information about control system design.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K6_W04] has a basic knowledge in IT, electronics, automation and control, computer graphics useful to understand the possibilities of their application in transport	The student is able to assess usefulness of typical methods and tools applied in engineering to select the proper method and tool for solving the simple problems in the range of control system			[SW1] Assessment of factual knowledge [SW3] Assessment of knowledge contained in written work and projects		
	[K6_U05] can formulate a simple engineering task and its specification within the range of design, construction and operation of means and systems of transport	The student is able to formulate simple engineering problems and its specification in the range of automatics and robotics			[SU1] Assessment of task fulfilment [SU3] Assessment of ability to use knowledge gained from the subject		

Subject contents	<ol style="list-style-type: none"> 1. Introduction and basic concepts 2. Classification of control systems 3. Modeling of dynamic systems and description of elements of automatic control systems 4. Types of mathematical models of dynamic systems: differential equation, transmittance, block diagram, linearization 5. Transition function and time characteristics 6. Feedback 7. Analysis of time-domain and frequency-domain control systems 8. Stability of linear control systems 9. Controls 											
Prerequisites and co-requisites	Pre-requisite subjects: <ol style="list-style-type: none"> 1. Mathematics 2. Physics 											
Assessment methods and criteria	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 40%;">Subject passing criteria</th> <th style="width: 30%;">Passing threshold</th> <th style="width: 30%;">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td>Colloquium for credit from exercises</td> <td>50.0%</td> <td>60.0%</td> </tr> <tr> <td>Colloquium for credit from lecture</td> <td>50.0%</td> <td>40.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	Colloquium for credit from exercises	50.0%	60.0%	Colloquium for credit from lecture	50.0%	40.0%
Subject passing criteria	Passing threshold	Percentage of the final grade										
Colloquium for credit from exercises	50.0%	60.0%										
Colloquium for credit from lecture	50.0%	40.0%										
Recommended reading	Basic literature	<ol style="list-style-type: none"> 1. Raven, F. H., Automatic control engineering, McGraw Hill Co., 1986. 2. Nise N. S., Control system engineering, John Wiley & Sons Inc., 2000. 3. Friedland B., Control System Design, McGraw Hill Co., 1986.
