

Subject card

Subject name and code	, PG_00041687								
Field of study	Transport and Logistics, Transport and Logistics								
Date of commencement of studies	October 2020		Academic year of realisation of subject			2022/2023			
Education level	first-cycle studies		Subject group			Optional subject group Subject group related to scientific research in the field of study			
Mode of study	Full-time studies		Mode of delivery			at the university			
Year of study	3		Language of instruction			Polish			
Semester of study	5		ECTS credits			3.0			
Learning profile	general academic profile		Assessment form			assessment			
Conducting unit	Faculty of Ocean Engineering and Ship Technology								
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. Piotr Bzura							
	Teachers	dr inż. Piotr Bzura							
Lesson types and methods	Lesson type	Lecture	Tutorial	Laboratory	Projec	t	Seminar	SUM	
of instruction	Number of study hours	0.0	0.0	0.0	30.0		0.0	30	
	E-learning hours included: 0.0								
Learning activity and number of study hours	Learning activity Participation in classes include plan				Self-study		SUM		
	Number of study 30 hours		10.0		35.0		75		
Subject objectives	The student is able to choose and apply the method of assessment and selection of a variant of the transport system or its element using a multi-criteria approach. Teaching how to think and act in an entrepreneurial way.								
Learning outcomes	Course out	Course outcome		Subject outcome			Method of verification		
	[K6_U06] in compliance with a formulated specification and with the aid of appropriate tools and methods, is able to complete a simple engineering task within the range of design, construction and operation of means and systems of transport		The student solves problems related to the selection of the best solutions to the problems they face, both in terms of costs and time.			[SU1] Assessment of task fulfilment			
	[K6_W06] has an organized knowledge on engineering methods and design tools allowing the conducting of projects within the construction and operation of means and systems of transport					[SW3] Assessment of knowledge contained in written work and projects			
[K6_W05] has an organized knowledge on design, construction and operation of means and systems of transport		The student is able to control his own supply chain, he manages the individual links of the chain.			[SW3] Assessment of knowledge contained in written work and projects				
Subject contents	The student carries out a project aimed at solving / preparing the possibility of implementing the activity in reality.								
Prerequisites and co-requisites	Delivery of the project in electronic form.								
Assessment methods	Subject passing criteria		Passing threshold			Percentage of the final grade			
and criteria	Project submission and project defense		51.0%			100.0%
