

Subject card

Subject name and code	Life Cycle Analysis of Building Materials , PG_00048496						
Field of study	Chemistry in Construction Engineering						
Date of commencement of studies	October 2020	Academic year of realisation of subject			2021/2022		
Education level	first-cycle studies	Subject group			Obligatory subject group in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			Polish		
Semester of study	4	ECTS credits			3.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of Energy Conversion and Storage -> Faculty of Chemistry						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Anna Kuczyńska-Łażewska				
	Teachers		dr inż. Anna Kuczyńska-Łażewska				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	15.0	0.0	0.0	30
	E-learning hours included: 0.0						
	Address on the e-learning platform: https://enauczanie.pg.edu.pl/moodle/course/view.php?id=19755 Adresy na platformie eNauczanie: ANALIZA CYKLU ŻYCIA WYROBÓW BUDOWLANYCH (LCA) - ChB 2022 - Moodle ID: 19755 https://enauczanie.pg.edu.pl/moodle/course/view.php?id=19755						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		2.0		43.0	75
Subject objectives	The aim of the course is to learn the theory of life cycle assessment (LCA) and the principles of implementation of the life cycle assessment and pro-ecological design of construction products, using specialized software.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	K6_U06	The student is able to use specialized software to solve problems.			[SU1] Assessment of task fulfilment [SU4] Assessment of ability to use methods and tools		
	K6_W10	The student has the knowledge to carry out the analysis of the life cycle of construction products, taking into account the principles of sustainable development and legal conditions. Can identify aspects where improvement can be made taking into account the above assumptions.			[SW1] Assessment of factual knowledge [SW2] Assessment of knowledge contained in presentation		
	K6_U04	The student has detailed knowledge and is able to make a critical analysis in terms of technology manufacturing of materials i products and their modifications i recycling.			[SU1] Assessment of task fulfilment [SU2] Assessment of ability to analyse information [SU3] Assessment of ability to use knowledge gained from the subject [SU5] Assessment of ability to present the results of task		
	K6_K04	The student is able to participate in the preparation of team projects, taking into account economic, ecological and legal aspects.			[SK3] Assessment of ability to organize work [SK5] Assessment of ability to solve problems that arise in practice [SK1] Assessment of group work skills		

Subject contents	LECTURE Definition and structure of the Ecological Life Cycle Assessment (LCA) technique Purpose and scope of the Ecological Life Cycle Assessment International environmental protection standards Life Cycle Assessment - ISO 14040 group standards LCA principles and structure. Analysis of a set of inputs and outputs. Life Cycle Impact Assessment. Life Cycle Interpretation Environmental Impact Assessment Systems Interpretation of LCA results Life cycle costs - LCC LCC life cycle cost models LCA and LCC applicationsLABORATORY EXERCISES Self-conducted analysis for a selected case		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Project	60.0%	50.0%
	Exam	60.0%	50.0%
