

GDAŃSK UNIVERSITY

Subject card

Subject name and code	Engineering Graphics II, PG_00039813							
Field of study	Materials Engineering, Materials Engineering, Materials Engineering, Materials Engineering							
Date of commencement of studies	October 2020		Academic year of realisation of subject			2022/2023		
Education level	first-cycle studies		Subject group			Obligatory subject group in the field of study		
Mode of study	Full-time studies		Mode of delivery			at the university		
Year of study	3		Language of instruction			Polish		
Semester of study	5		ECTS credits			2.0		
Learning profile	general academic profile		Assessment form		assessment			
Conducting unit	Zakład Konstrukcji Maszyn i Inzynierii Medycznej -> Institute of Mechanics and Machine Design -> Faculty of Mechanical Engineering and Ship Technology							
Name and surname	Subject supervisor		dr inż. Katarzyna Zasińska					
of lecturer (lecturers)	Teachers		mgr inż. Tomasz Żochowski					
			dr inż. Katarzyna Zasińska					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Projec	t	Seminar	SUM
	Number of study hours	15.0	0.0	15.0	0.0		0.0	30
	E-learning hours included: 0.0							
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study		SUM
	Number of study hours	30		5.0		15.0		50
Subject objectives	The aim of the course drawings in accordan of presenting connect CAD systems. Funda creating 3D models o	is to shape the ce with the app tions and comp mentals of 2D f machine com	e 3D imaginatio licable standar onents of drive computer sketo ponents in virtu	on, to learn the rds and rules o e systems in a ching of machir ual space.	principl f technic technica ne comp	es of pr cal draw Il drawin conents	rojection and ving, to learn ng. Introducti . Principles a	defining the principles ion to basic and methods of

Learning outcomes	Course outcome	Subject outcome	Method of verification
	K6_W05	A student draws space elements based on orthographic projection. He presents the rules of presentation elements in engineering drawing. He draws and reads structural forms of threedimensional mechanical elements. He describes surface attributes of elements. He draws of machine elements dimensions and creates working drawings of machine elements according to machine technical drawing standards. He creates working and assembly drawings of machine elements. He reads information about machine elements and units drawings. He draws and reads structural forms of three-dimensional mechanical elements and mechanical units. He reads diagrams of complex mechanical systems.	[SW1] Assessment of factual knowledge
	K6_U01	The student understands the importance of Engineering Graphics in the process of implementing design tasks. The student applies the rules set out in the standards for the presentation of technical objects on the drawings.	[SU1] Assessment of task fulfilment
	K6_U03	A student draws space elements based on orthographic projection. He presents the rules of presentation elements in engineering drawing. He draws and reads structural forms of threedimensional mechanical elements. He describes surface attributes of elements. He draws of machine elements dimensions and creates working drawings of machine elements according to machine technical drawing standards. He creates working and assembly drawings of machine elements. He reads information about machine elements based on presented elements and units drawings. He draws and reads structural forms of three-dimensional mechanical elements and mechanical units. He reads diagrams of complex mechanical systems.	[SU1] Assessment of task fulfilment [SU3] Assessment of ability to use knowledge gained from the subject
	K6_K01	The student understands the importance of Engineering Graphics in the process of implementing design tasks. The student applies the rules set out in the standards for the presentation of technical objects on the drawings.	[SK2] Assessment of progress of work

Subject contents	LECTURE					
	Dimensioning of lengths, diameters, angles. Determination of tolerances and fits of parts on drawings. Determination of surface condition of parts. Location of elements on a drawing. Drawing rules of working and assembly drawings. Standarization in engineering graphics. Drawing of detachable connections e.g. threaded, screen connection. Drawing inseparable connections (welds connections in the drawings and dimensioning them). Drawing shafts.					
	LABORATORY					
	Introduction to basic CAD systems AutoCAD, Inventor, etc. Overview of engineering calculations softwareused in analyses of stress, pressure, velocity, temperature and other field distribution problems. Fundamentals of 2D computer sketching of machine components: scale, size, layers, colours, line types, dimensioning, printoutpreparation. Principles and methods of creating 3D models of machine components in virtual space.					
Prerequisites and co-requisites	Understanding of the fundamentals of descriptive geometry. Basic competence in mechanical technicaldrawing. Basic competence in the principles of the creation and completion of technical documentation inpaper form. The capability to understand and interpret technical drawings.					
Assessment methods	Subject passing criteria	Passing threshold	Percentage of the final grade			
and criteria	Practical exercise	56.0%	10.0%			
	Colloquium at the end of semester	56.0%	90.0%			
Recommended reading	Basic literature	 Dobrzański T.: Rysunek techniczny maszynowy. Wydawnictwo Naukowo-Techniczne, Warszawa 2006.
